## WRECKAGE OF LOST DINGHY FOUND ASHORE

Provincial Police Hold Little Hope of Finding Crew Of Mae West

**TRAWLER IS RAISED AT CHATHAM ISLAND**

Finding of the splintered wreckage, yesterday, of the dinghy belonging to the Mae West, small fishing trawler that went around Chatham Island Tuesday, weakened hopes of finding alive Captain Harold Slatery and Jack Cain, believed to have been aboard the launch when it was wrecked.

Raymond A. Slatery, Vancouver detective and brother of the missing captain, and Oscar L. Johnson, owner of the Mae West and uncle of Jack Cain, viewed the wreckage yesterday after it had been raised at Chatham Island beach. Wreckage of the craft's dinghy was found scattered along the shoreline of the island. The hull of the Mae West was found, it was reported.

While gale-like winds rushed through the Gulf of Georgia, the Mae West was first sighted Tuesday about noon. It was about a mile and a half offshore, with only its bow above water. P. Rowley, head of binoculars, said he thought he discerned two persons aboard, and when he looked later, he explained, he could not see them.

Later the Mae West was found aground at Chatham Island.

## WILL RESUME NEGOTIATIONS

Study of Reciprocal Trade Agreement to Be Renewed Next Week

OTTAWA, Nov. 1 (AP)—Trade and tariff experts representing the Dominion Government will return to Washington next week to continue negotiations for a reciprocal trade agreement with the United States. It was learned on good authority today that what fresh instructions have received from the new government have not been divulged.

For some weeks prior to the general election the Canadian trade mission headed by H. B. McKinnon, tariff commissioner of the Department of Finance, and L. D. Wilgors, chief trade commissioner, were in Washington conferring with United States trade authorities. They returned just prior to the elections and negotiations have been at a standstill since then.

**NO DEFINITE DECISION**  
The government will more than a week in office, has not reached finally on this question. It is understood its attitude towards the basis for negotiations upon which the delegation first met the United States authorities has been practically decided and the experts have been ordered to stand in readiness to leave some day next week.

Whether the new minister to Washington will be named prior to the resumption of negotiations is not known. Several prominent Canadians have been rumored to be in line for the appointment as successor of Hon. W. D. Herridge, M.P., who left the United States after the Bennett Government, but there has been no official or semi-official indication as to who the appointee will be.

## DYNAMITE ADRIFT IN SOUTHERN BAY

Five Hundred Cases of Explosive Washed Overboard From Barge At San Francisco

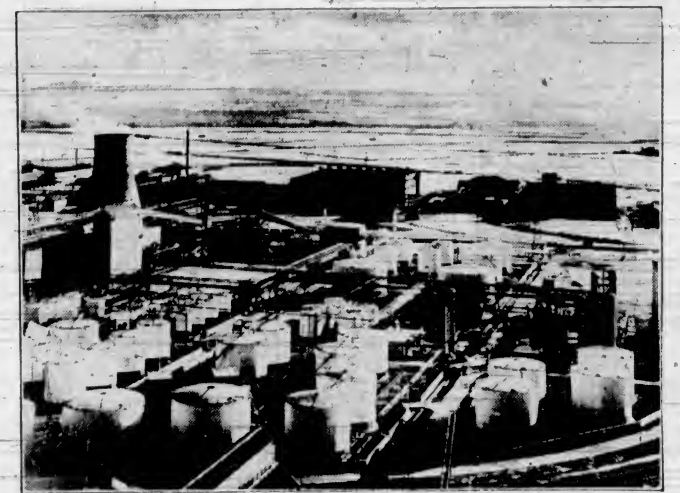

SAN FRANCISCO, Nov. 1 (AP)—Five hundred cases of dynamite, torn loose from the sinking barge Adelia, were reported floating in the storm-tossed waters of San Francisco Bay tonight by the Marine Exchange.

As stevedores were transferring the dynamite to the freighter Concord, a sixty-mile-an-hour sea suddenly roared out of the north, jerking the barge's anchors loose, the wind tore the Adelia away from the Concord and sent it drifting helplessly away before the eleven men on board could keep off.

About one mile off Hunter's Point, the coast guard Schooner, maneuvered carefully alongside, rescued the eleven stevedores and then towed the Adelia to Powder Anchorage No. 13.

**STARVED IN PRISON**  
JOLLY, III, Nov. 1 (AP)—William Neill, thirty-five, serving a thirty-year term for murder, was found stabbed to death in a cell yard of the State prison today.

## First Coal-Converting Plant Is Opened

Here is an infra-red view of the hydrogenation plant, the first of its kind in the world, which was opened by Mr. Ramsay MacDonald recently at Billingham-on-Tees, Durham. This plant will produce gasoline from coal and when in full production will make 100,000 tons of gasoline, or 30,000,000 gallons, direct from coal, and 50,000 tons or 15,000,000 gallons from tar products, equal in all to 45,000,000 gallons of gasoline a year. Experts say this gasoline is better and cheaper than the gasoline now being sold and is becoming very popular in the British Isles.

## Sharp Earthquake Leaves Rail Lines Damaged in Northern Quebec Section

**Guards Placed at Public Buildings To Halt Bombings**  
MILWAUKEE, Nov. 1 (AP)—Guards were flung about all public buildings today as the Milwaukee Police Department picked up the challenge hurled to its very door by terrorist dynamiters.

In the past six days, two precinct police stations, two branch banks and a suburban village hall have been damaged extensively in a series of five apparently motiveless bombings.

## Two Are Shot Dead in Gun Fight in Jail

NEW ORLEANS, Nov. 1 (AP)—Two negro youths were shot to death in their cell in the Jefferson parish jail, across the Mississippi River from New Orleans, today after they had wounded Sheriff Frank Clancy and a deputy slightly in a gun fight.

Using a revolver smuggled to them last night, the negroes, Sheriff Clancy said, opened fire when he went to their cell to disarm them after receiving a tip from a third negro prisoner. Officers returned the fire.

## DISCOUNT NEWS FOR HOME CONSUMPTION

ROME, Nov. 1 (CP-Havas)—Skepticism regarding war communications was indicated today even in the strictly controlled Fascist press.

"Although yesterday's communiqué does not speak of it," said The Messaggero, "it seems we are faced with a counter-offensive on the Tigris front."

## Federal Bond Issue Of \$75,000,000 Will Be Offered Monday

**Minister of Finance Says Government Recognizes Necessity of Early Balancing of Budget—New Loan in Two Maturities**

OTTAWA, Nov. 1 (AP)—A \$75,000,000 Dominion Government bond issue will be offered to Canadian investors on Monday next, Finance Minister Charles Dunning announced tonight. At the same time Mr. Dunning declared: "The Government has no uncertain view as to the necessity of the early balancing of the budget and the orderly financing of its maturing and callable obligations."

The money will be used for general purposes and the bonds will be in two maturities, four and nine years, and will not be used for refunding.

This will be the first major financial operation of the new Government, the only other loans negotiated since Prime Minister Macleod's formation of his third administration on October 23 being

## Report Says Lyons Asked Hughes to Leave His Cabinet

LONDON, Nov. 2 (AP)—A Reuters News Agency dispatch from Melbourne today said Prime Minister Joseph A. Lyons announced he had asked William Morris Hughes, Vice-President of the Executive Council, to resign from the Cabinet because of differences over the question of Nationalist sanctions against Italy.

## COMMUNISTS ARE BLAMED

**Shooting of Premier of China Said to Have Been Organized Plot**

NANKING, China, Nov. 1.—The critical wounding of Premier Wang Ching-wei by an assassin today was blamed by police upon a "well-organized plot by Chinese Communists."

Eleven suspects are held in the assassination attempt, including a girl Communist. The would-be killer is gravely wounded.

Wang Ching-wei, fifty, popularly regarded as pro-Japanese, and another official of the Nationalist Government were shot down just before a meeting of Chinese leaders to consider Japanese demands concerning China.

The assassin, Sun Ming-Hsun, was critically wounded. Police were unable to say definitely whether he shot himself or was wounded by the Premier's bodyguard, which returned the fire.

**IDENTIFIED AS REPORTER**  
Police identified the assassin as a reporter for a Chinese news agency. They said he used a camera to shield his pistol.

The other official wounded was Chang Chi, former president of the judicial Yuan, but his injury was not serious. Two other high officials, Tseung Chun-Min, vice-minister of interior for railways, and Kan Nai-Kuang, chief of the political bureau of Generalissimo Chiang Kai-Shek's headquarters, although in the general line of fire, escaped injury.

The meeting of the Chinese leaders, which was important in the Government's history, was resumed despite the assassination attempt. Major political and military leaders were here from most sections of China.

## WOULD SMASH CHIANG'S RULE

**Japan's Policy in China Said To Be Creation of Autonomous Northern State**

TOKIO, Nov. 1 (CP-Havas)—Japan's new policy in China is to smash the power of Marshal Chiang Kai-Shek, create an autonomous state in the North and support anti-Chiang and anti-Nanking elements in the South, it was understood today from high official sources.

The Japanese army, looking with disfavor on the growth of Chiang's power, he drove Communist armies from Central China and brought under United rule ten of China's eighteen provinces.

## CO-OPERATION HOPELESS

At the conference of military and diplomatic officials in Tokyo a month ago, military leaders told the Foreign Office that its policy of co-operation with Chiang was hopeless.

Chiang, they said, regarded himself as powerful enough to resist Japanese pressure. It was also feared he would consolidate his grip at the present meeting of Kuomintang leaders in Nanking.

From this the Japanese saw a possible rapprochement with the Soviet Union directed against Japan. The Japanese, it was indicated here, desire to find a Chinese leader capable of assuming responsibility for an independent northern government with Japanese support. Such a government would be able to seize customs revenue collected at Tientsin.

## SPEECH OF CANADIAN MARKS TURNING POINT IN DISCUSSION OF SANCTIONS BY COMMITTEE

**Raven Has No Fear of Big Cougar**

NANAIMO, Nov. 1.—Are panthers afraid of ravens? Apparently some of them are. Recently at the plunger camp on Nanaimo River which has been established by the Government, a panther of unusual size was seen near the camp. It started across a small bridge over Nanaimo River, but when half way across, a big black raven swooped down toward the big cat, and the latter cowered away and crouched for several minutes under the protection of the bridge railing. Eventually, after several swoops made by the raven, the panther broke into a run, and quickly disappeared in the timber on the opposite side of the river.

**Mercury Falling Fast on Mainland**

VANCOUVER, Nov. 1 (AP)—Vancouver continued to shiver tonight as the mercury indicated a continuation of the low temperatures which two days ago set an October record.

E. B. Shearman, Dominion meteorologist, said the thermometer registered 26 degrees above zero at midnight and was falling fast, with the probability it would be around 21 degrees at 6 a.m. tomorrow, the coldest hour of the twenty-four.

## BATTLES HARD TO SAVE LIFE

**Northland Trapper Reports Shooting Affray Then Returns to Aid Victim**

EDMONTON, Nov. 1 (AP)—At snow-bound Whitecourt, 165 miles north-west of here, Otto Schmidt, who Wednesday night, shot Eric Moeller, fellow-veteran of the German army, tonight was making valiant efforts to save his victim's life.

Following the shooting, Schmidt walked thirty-five miles through the sub-arctic night to report the affray to Royal Canadian Mounted Police. After forty-eight sleepless hours he is driving a dog team back across the bitterly cold plains to bring the wounded man to hospital.

**DISPUTE OVER CACHES**  
Schmidt and Moeller, both trappers, were recently involved in a court case over thefts from food caches on the trap lines. Wednesday, Schmidt, who believed that Moeller had been robbing his caches, took Tom Martin, another trapper, to Moeller's cabin and charged him point-blank with the theft.

According to police information, Moeller warned the two men off with a gun. Schmidt, reached for his own automatic and drilled a shot through Moeller's wrist. It apparently nicked a bone and then tore on through his left side just below the heart.

**TRAMP ON SNOWSHOES**  
Leaving Moeller's younger brother, Paul, with the injured man, Schmidt and Martin struck out on snowshoes through the coldest night of the year. Passing through completely uninhabited country for fifty-five miles, they reached Whitecourt on Thursday morning.

A doctor left Edmonton by train immediately the shooting was reported and will attend Moeller if Schmidt manages to get him back through the wilderness.

## Conservatives Make Greatest Gains in Municipal Elections

**Ballots Show Labor's Losses Heaviest in Hundred Cities and Boroughs of England and Wales Accounted For Up to Date**

LONDON, Nov. 2 (AP)—Conservatives registered impressive gains in municipal elections throughout England and Wales, returns showed early today. Most of their gains were at the expense of Labor candidates.

Voters balloted in more than 300 cities and boroughs. Municipal elections in Scotland take place November 5.

With returns available from 103 places, the returns showed the following changes: Conservatives, fifty gains and eighty losses; Liberals, ten gains and two losses; Labor, thirty-six gains and sixty losses. Independents, twenty gains and twenty-six losses.

## Australian Cruiser Sydney On Duty in Mediterranean

**Early Date to Be Fixed for League Members to Cut Off Purchases From Italy—Italians Seeking Showdown on Trade Relations With Government of the United States**

GENEVA, Nov. 1.—The League of Nations committee of eighteen decided today to fix an early date for member powers to cut off all purchases from Italy after Canada's representative had contended that exceptions in the application of sanctions would destroy the solidarity of collective action.

Meanwhile, Italy's Baron Pompeo Aloisi and France's Premier Laval talked long and earnestly on the possibility of a peaceful settlement of the Italo-Ethiopian conflict.

**WOULD BE PREJUDICIAL**  
"Economic sanctions are the key to the whole position," Dr. Walter A. Riddell, Canada's permanent representative at Geneva, told the sub-committee. He said to make exceptions not only would prove prejudicial to other countries observing the sanctions imposed by the League.

He warned that such procedure would also postpone the effectiveness of a general embargo and said he could not associate himself with anything that would weaken the sanction boycotting Italian goods. His speech was regarded by members as the turning point in a complicated discussion.

Rumania and other countries had asked for special consideration in connection with application of sanctions. The Rumanian delegate said his country had a credit balance.

**CITY LOAN IS NOW RATIFIED**  
Premier Pattullo Says Government Will Lend \$100,000 to Victoria

VICTORIA, Nov. 1 (AP)—The Provincial loan of \$100,000 was approved yesterday by the Government. Premier Pattullo announced the decision of the Government to lend the money, after Mayor David Leeming and Alderman T. W. C. Hawkins had interviewed members of the Cabinet on the proposal.

City officials approached the Government with the schedule of works drawn up by the city council, and began negotiations for approval of the actual projects that may later be undertaken with the money.

It has already been announced by the Government that the loan for relief works in the Victoria area will be treated as an ordinary loan and must be repaid with interest eventually.

The money itself will come from the \$2,000,000 "heat egg" in the sinking funds with which the Province recently bought in a fresh issue of British Columbia bonds covering special relief works programmes in Provincial and civic areas.

## OREGON TO HAVE BIG NEW CAPITOL

SALEM, Ore., Nov. 1 (AP)—The Oregon Senate tonight passed a bill calling for the construction of a \$3,500,000 capital building on the site of the old Statehouse, with the provision that two city blocks to the north be added to the state property.

The action marked another definite step towards the construction of a new state building to replace the fifty-nine-year-old structure destroyed by fire last Spring. A Government loan and grant of \$3,500,000 already has been approved.

The Senate's measure, which eliminates proposals for a smaller building and other sites, now goes to the House.

## MINING DEVELOPMENTS WILL BE DISCUSSED

VANCOUVER, Nov. 1 (AP)—Major developments in mining throughout Canada will be discussed at a national gathering of mining men to be held here November 12 to 15, under the auspices of the Canadian Institute of Mining and Metallurgy. Among other discussions will be that of taxation of mining.

## HOTELS GO DRY BY COMPULSION

Ontario Premier Orders Privileges Suspended of Alleged Tied Houses

TORONTO, Nov. 1 (AP)—Beverage room doors of nineteen Ontario hotels, charged with being directly connected with Brewing Corporation of Canada, affiliates, were closed tonight on the order of Premier Mitchell Hepburn. Brew and wine sale authorities were suspended.

Mr. Hepburn's order was issued following a meeting of the Cabinet, which considered a report of Liquor Commissioner Edmund G. Odette. The commissioners and staffs of his department opened an investigation into alleged "tied" hotels two weeks ago.

Twelve of the affected hotels operate in Toronto and the remaining seven in other parts of the province.

**DEFINITELY LINKED**  
The Premier, announcing the Cabinet's decision, said the operation of the hotels was definitely linked through Mohawk Investments, Limited, with breweries that were affiliated with Brewing Corporation of Canada.

Suspensions will remain in force, he said, until such time as the hotels involved are sold or otherwise disposed of and new management, satisfactory to the liquor commission, are established. He said the new management must be connected in any way, directly or indirectly, with the brewing trade.

"We are not opposed to the hotel chain system," Mr. Hepburn remarked, "but this was a clean-cut case of hotels being operated for the express purpose of selling particular brands of beer—in other words, of establishing a monopoly of sales."

**SHOCKS CONTINUE TO SHAKE HELENA**  
No Damage Results From Latest Quakes—Many Citizens Leave City for Time

HELENA, Mont., Nov. 1 (AP)—As new shocks of undamaging force rolled across this city, where 979 homes and seventy-seven business houses and apartments were damaged by the terrific shocks of October 12 and 18, Oscar Baarson, city engineer, estimated that the additional loss from yesterday's wrecking tremor at between \$500,000 and \$1,000,000.

In zero weather, hundreds faced the likelihood of another night about camp fires rather than return to damaged or uninhabitable homes.

Additional troops were put in service today to accommodate scores who decided to leave the city until the shocks have ceased.

## British Electors Go To Polls Once More As Crisis Threatens

Government With Majority Such as None Ever Had Before in History Again Flies National Flag for Coming Election Campaign

LONDON, Nov. 1 (P)—After four years, 31,000,000 British electors again go to the polls. As in 1931, the Government flies the National flag; again, as four years ago, it appeals in time of crisis, with the general election November 14.

Issues and figures have changed. Seats from Conservatives and one seat from the Samuelite Liberals. Party strength in the House of Commons at dissolution, 400: Government (312); Conservative, 462; National-Labor (Ramsay MacDonald's party), 14; Liberal-National (Sir John Simon's party), 36; Opposition (81); Labor, 41; Liberals (Sir Herbert Samuel's party), 26; Lloyd George group, 4; Independents, 11; vacancy, 1. Total, 615.

### HOPELESS EFFORT

After an abortive effort to stem the tide, Mr. MacDonald resigned and formed a National Government of ten. It comprised Conservatives under Stanley Baldwin; Liberals under Sir Herbert Samuel, but of his old Labor colleagues, Mr. MacDonald was only able to retain three, Philip (now Lord) Snowden, Chancellor of the Exchequer; Lord Sankey, Lord Chancellor; J. H. Thomas, Secretary of State for the Dominions. Mr. MacDonald could muster but fourteen supporters from 265 Labor members in the House of Commons.

On Tuesday, October 27, 1931, the National Government appealed to the polls on a doctor's mandate to meet the crisis. It was returned with such a majority as no British Government had received before.

### AT DISSOLUTION

At dissolution in 1931, the line-up stood: Conservatives, 263; Labor, 285; Liberals, 58; National Labor, 15; Independents, 14.

When the new House of Commons met a week later, the state of parties was: National Government (554): Conservatives, 411; Liberal-National, 35; Liberal, 33; National-Labor, 13; National, 2; Opposition (56): Labor, 52; Independent-Labor (Lloyd George group), 4; Independent, 5.

Unity in the new Government did not endure. Introduction of tariffs was the dividing line. The Government continued under the leadership of Sir Herbert Samuel, were frankly opposed; Liberals who followed Sir John Simon, supported. Differences over fiscal policy increased until, on the Ottawa Agreements, Sir Herbert Samuel and twenty-eight Liberal supporters of the Government crossed the floor of the House into opposition. The Samuelite Liberals remained with the Government.

### HIS THIRD CABINET

In June last, Ramsay MacDonald resigned, and Mr. Baldwin, Conservative Leader, formed his third Cabinet, with Ramsay MacDonald as Lord President of the Council. It is this new Government which now appeals to the electors.

Since the last general election the Labor Opposition has gained nine

## DECISION NOT YET POSSIBLE

Premier Pattullo Denies Local Option Report on Beverage Issue

Premier Pattullo took vigorous exception yesterday to news reports stating the Government had made up its mind about beer and light wines by deciding to submit a local option bill to the Legislature. He denied, also, that there had been any split in the Cabinet over the issue.

While the executive had considered the Victoria beer and wine petition, no decision had been asked from it in reference to the sale of these beverages throughout British Columbia eating establishments, and the Cabinet had not yet made a decision on the issue, the Premier said.

An attempt had been made, he said, to declare what was in the Government's mind, and to give this result as a Cabinet dictum. The Premier renewed his recent utterances about curbing the press if misleading statements were continued.

## CANADIAN'S SPEECH IS TURNING POINT

Continued from Page 1

45,000,000 lei (approximately \$400,000) against Italy.

### MAY BE SET TODAY

The date for cutting off purchases from Italy will be set by the League's "general staff" of fifty-two nations, which is expected to meet tomorrow. But several delegates proposed November 14 or 15 for the actual start of the boycott.

The last general election the Labor Opposition has gained nine

## Directing Italian Forces in Ethiopia

Our Photograph Shows General de Bono (Facing Camera), Commander-in-Chief of the Italian Army in East Africa Until Recently Superseded by General Badoglio, Directing Operations on the Italian Front.

earlier date was suggested by Anthony Eden, Great Britain's Minister for League Affairs.

Nothing definite came immediately from the conversations between M. Laval and Aloisi. French sources indicated that M. Laval still was pursuing his policy of conciliation, with the hope of at least laying the groundwork for an eventual accord.

Tomorrow the Italian delegate will meet Sir Samuel Hoare, the British Foreign Secretary.

Before Aloisi arrived a spokesman for Italy told the Associated Press: "Italy does not refuse to negotiate peace. But we are not running after peace. Any peace terms, to be acceptable to Italy, must recognize, first, our security needs, and second, our expansionist requirements."

"NEUTRAL INDIFFERENCE" The Associated Press learned from Japanese sources that no reply is expected immediately from Japan to the League's communication on sanctions. The Japanese attitude was described as generally one of "neutral indifference."

In French circles it was reported that Sir Samuel and M. Laval had agreed that the economic boycott of Italy should be applied at an early date. The committee of eighteen "for immediate" sanctions also conceded this was essential, regardless of clearing and credit balances.

The committee of eighteen, however, was unable to finish its discussion of sanctions difficulties.

A sub-committee of six, consisting of Great Britain, France, Rumania, Yugoslavia, Spain and Greece, was appointed to examine what can be done to minimize the losses of those nations which have credit or clearing balances with Italy.

In Britain, France, Spain, South Africa and Belgium an urged that November 14 or 15 be fixed for the start of the "buy nothing" boycott.

There was considerable discussion in League lobbies, also, as to the feasibility of adding coal and oil to the list of "key products" on which export to Italy will be permitted.

Argentina informed the League of its acceptance of financial sanctions and the embargo on exportation to Italy of "key products." The communication stated that a special law of Congress was needed for the "buy nothing" boycott sanction.

When the committee of fifty-two adjourns—as it expects to do tomorrow night—special and permanent sub-committees will be created to handle problems of an economic, financial and juridical nature, as well as the compensation agreement among League states and any questions which remain unsettled.

## EARTHQUAKE LEAVES RAILWAYS DAMAGED

Continued from Page 1

Damage caused in the Northern Quebec district stood as ample proof that had the epicentre been a few hundred miles farther south, great damage would have been done to buildings and homes, water and gas mains, in heavily-populated regions.

As it was, there were only light frame dwellings to be shaken in the sprawling country on both sides of the Quebec-Ontario boundary. CNR traffic may be disrupted on the La Tuque-Cochrane line for as long as eight days.

TRUSTEES IS DAMAGED About 225 miles east of Cochrane, the fissure, having the appearance of a long hole, showed on the C.N.R. right-of-way where it traversed a built-up dump. The railway rushed repair crews to the spot. While passenger traffic was being transhipped over the break and freight traffic diverted over another route, it was believed a trestle would have to be constructed.

The disturbance was close to the surface. Miners working at a depth of 500 feet at Kirkland Lake and Sudbury came to the surface yesterday morning without knowing that a great part of Eastern Canada and United States had been alarmed during the night.

WIDE AREA AFFECTED The earth shivered, the shiver starting in the North country and rippling down in an ever-widening course to be felt as far west as Fort William, at the head of Lake Superior, and as far east as Saint John, N.B.

As the earth pushed in a series of short jerks, windows rattled, beds shook, loose plaster fell from ceilings, brick chimneys tumbled. They were the signs that told all Ontario and Quebec and seventeen states across the border that the earth's crust had shifted.

The tremors started at 1:05 and lasted less than a minute in most areas.

THE NEXT OBJECTIVE ASHARA, Ethiopia, Nov. 1 (P)—Tenseness gripped this city today with the prospect of an Italian advance upon Makale, the next major objective of the fascists.

British capital was filled with movement and excitement. Truck loads of troops and supplies rolled through the city to the front.

Hundreds of tons of supplies went over the newly-laid roads to the front. Although today was All Saints' Day, a national holiday in Italy, the movement to the front here not only continued, but increased.

SEEKING SHOWDOWN WASHINGTON, Nov. 1 (P)—A quick showdown on American trade relations with Italy was indicated today by an Italian request for information on trade agreements between the United States and other countries.

Behind the move lay negotiations for an American-Italian reciprocal trade treaty, begun early in the Spring, but dormant since the Italo-Ethiopian dispute flared into the open and President Roosevelt worked the full moral pressure of the Government to discourage trade with both belligerents.

Italy may regard the United States, a non-member of the League, as a possible source of materials denied her by League members. President Roosevelt, however, has sought to prevent this on the ground that sales to either belligerent might involve this country in war or prolong hostilities.

GIBRALTAR, Nov. 1 (P)—The Australian cruiser, Sydney, sent to Mediterranean waters to join Great Britain's fleet units there, arrived this afternoon from England.

The Sydney carries eight six-inch guns and four four-inch guns, her speed is thirty-two and one-half knots.

The British Admiralty announced in London today that the Australian Government had placed the Sydney at the disposal of Britain for Mediterranean use, and the offer was accepted.

The Sydney will replace the British cruiser Achilles, which will return to England for recommissioning.

## Returning to Japan to Resume Teaching Duties

Mrs. Gardiner Hall, Member of Staff of Tsuda College for Girls, Tokio, Tells Some Interesting Facts About Institution

An interesting personality in the educational world in Japan is Mrs. Gardiner Hall, who, after several days' visit here, is sailing this afternoon for Tokio to resume her duties as English teacher at Tsuda College.

This higher institution of learning for girls was founded thirty-five years ago by Miss Ume Tsuda, one of the first women of Japan to secure an Occidental education and put it to practical advantage in her own country for her own countrywomen. Mrs. Hall, speaking to The Colonist yesterday, recalled that Ume Tsuda was one of five young Japanese girls sent by their parents to the United States in 1870, with the first official commission that left Japan that year. The purpose of their coming was to receive the benefits of the liberal education available on this side of the Pacific.

All the girls proved good students, graduated from American colleges in due course and returned to their own country to occupy important positions, either as the wives of men holding distinguished office or in the educational world. Ume Tsuda, thirty-five years ago, opened the college which bears her name; another of the girls became Princess Oyama on her marriage, and a third married Baron Uru, admiral in the Japanese Navy.

TRADITION ESTABLISHED Six years ago Miss Tsuda died, but the college was firmly established long before this and carries on with the same tradition and ideal of giving the young womanhood of the East the best that can be culled from the liberal education of the West.

The school has about 350 students. The staff, although largely Japanese, has ten or twelve foreign teachers, of whom Mrs. Gardiner Hall is one. She has been attached to the school for the past eight years, but last April came back to America for an extended holiday with friends in New York, Boston and other cities of Eastern United States.

LIKES GIRLS "The Japanese girls are very apt, very keen, very enthusiastic and a great joy to teach," Mrs. Gardiner Hall reports in referring to her students at the college. With some difficulty they adjust themselves to the present-day conditions that are constantly impinging on the life of Japan, however. Tsuda College is

one of the higher schools of learning for women, and when the girls go there they have already had strict training in some of the age-old ceremonial of their country, including the classical tea-drinking ceremony. This is considered so important that it is taught to the young girls in the schools before they arrive at college age.

By a curious coincidence, Mrs. Gardiner Hall's place in Tsuda College has been filled, during her absence, by Mrs. Burbank, who, before her marriage, was well known in Victoria as Miss Margaret Torrible. Mrs. Burbank, it is understood, is to have a permanent position on the staff henceforth.

Lettuce costs ranged yesterday from \$1.30 to \$1.50 a crate. Pre-front rates were ninety cents per crate. Spinach was not visibly affected, although the market jumped one cent per pound. Carrots were up sixty-five cents per sack to \$1.25, while parsnips were up fifty cents to \$1.25 and \$1.75 per sack.

The greatest damage was in the Keating district, with Saanich farmers bearing the brunt of the \$30,000 vegetable loss.

TORONTO, Nov. 1 (P)—Liquor control board profits of \$6,825,000 for the fiscal year ended yesterday were turned over to the Ontario Government today by Liquor Commissioner E. G. Odette.

ARGENTINA'S WHEAT BUENOS AIRES, Nov. 1 (P)—Argentina's export surplus of wheat as of October 31, today was officially placed at 35,684,000 bushels (968,461 tons). Export sales for the current year to date were announced as 3,631,228 tons.

To Canada, Great Britain, the United States and Mexico, except districts as above:

Yearly ..... \$6.00  
Half-Yearly ..... 3.00  
Quarterly ..... 1.50

Saturday, November 2, 1935

## THE VIRTUE OF THRIFT

Saving, not spending, will bring employment, says Mr. Lewis Douglas, writing in The Atlantic Monthly, and the argument he deduces to this end is a forcible one. At the present time he sees a welter of nostrums, fads and theories advanced as panaceas for economic ills; but on one point nearly everyone is in agreement, namely, that the solution of the problem of unemployment is the solution of depressed times. Where there is disagreement is in the methods that should be employed to achieve economic recovery. The bulk of public opinion seems to be in favor of spending a way to prosperity. This is the view-point that Mr. Douglas combats.

The average man, says Mr. Douglas, is puzzled by the sudden fashion in which thrift, which was formerly regarded as a virtue, is now classified as a vice. Although taught all his life to save, the gospel is now preached that such saving is detrimental to the public welfare. Mr. Douglas says this contention is advanced on the assumption that the consumption of goods has declined and must be greatly increased if economic recovery is to be achieved. He deduces facts, however, to show that this contention cannot be supported. From these facts he reaches the conclusion that the primary problem is to create re-employment in the capital-goods industries. The theory that this can be done by stimulating consumer-purchases does not work out in most cases. He gives an instance. In the United States in 1931 the Government paid \$1,000,000,000 to War Veterans in the form of a cash bonus. There were immediate increases in the sale of motor cars and other types of consumer-goods. There was, however, no corresponding increase in the sale of capital goods and the increased consumer spending did not increase employment in the capital goods industries. In other ways in the United States, aided by forced-draft methods, consumer-spending has been increased. There has been no corresponding increase in the capital-goods industries. Unemployment in such industries continues at almost record levels.

In the face of the propaganda undertaken for the spending of more money the consumers as a whole have been increasing their savings. Mr. Douglas puts forward the contention that such savings should be encouraged. "Savings," he says, "do not represent hoarded money which brings the community no benefits. Savings are spent—not necessarily by the saver, but by others who borrow his surplus or in whose business the saver's funds are invested, either by him directly, or by institutions acting in his behalf. Thus a nation's savings do not represent a sterile, static factor in its economy but, rather, an exceedingly dynamic one. Moreover, savings when invested, are not usually spent for goods which are immediately consumed. They are spent for goods which in turn produce more goods and more wealth, which enriches the community as a whole. The distinction is the same as between corn which is eaten and seed corn which produces the next year's crop."

Savings thus have their basis in goods and services. They are reserves out of present and past production which are set aside for future enjoyment, for the purpose of producing more things in the future. These surpluses, Mr. Douglas shows, when converted into money, give to savings a mobility that benefits the community as a whole by permitting their efficient use through the medium of investment. Mr. Douglas says: "The greatest, employing power in our society has always been this thing that we call savings. The availability of sufficient savings in the past has permitted the expansion of old industries and the creation of new ones, and over a long period of years has resulted in tremendous increases in the number of people gainfully employed. Under our competitive system the result has been better goods at lower prices. This trend over a long period of years was responsible for the great improvement in the American standard of living." The whole argument evolved by Mr. Douglas is that common sense and every precedent show that the investment of a dollar of savings can do more to relieve unemployment than can a dollar of additional consumer-spending. In other words, thrift remains the virtue it always was and is as much a panacea for the world's economic troubles today as at any time in history.

## HANDS OFF THE SCHOOLS

It is a matter of common knowledge that the teaching staffs of our elementary and high schools in every province of the Dominion have shown themselves able and willing to carry on the work of education without doing violence to the political or the religious opinions of the parents whose children are entrusted to the care of the schools. Teachers generally know very well that it is no part of their duty to busy themselves with topics of a highly contentious character. The teacher, on being appointed, enters into a contract with the school trustees to conduct the school in strict accordance with the school law. The subject matter to be taught is set forth very clearly in the authorized programme of studies and in the prescribed textbooks. Teachers, of course, like other citizens, are entitled to hold their own opinions and to give expression to them at the proper time and in the proper places, and those who are acquainted with the schools are well aware that the teachers, with an altogether admirable detachment, have almost invariably observed and respected the private rights of pupils and parents and have carefully avoided the discussion, in the schoolroom, of matters connected with denominational religion or party politics.

There are branches of study, particularly in literature and history, the teaching of which might through inadvertence offend the susceptibilities or the prejudices of parents or pupils, but common sense and a spirit of fairness are all that is necessary to avoid such a danger. The relation

between trustees and teacher is defined by a contract. The teacher is there to serve the community in an especial way clearly understood by everybody. He is not there as the exponent or expositor of his or that political party doctrine, theological dogma, or economic theory. Any teacher in a public school who finds himself wavering between his contractual obligations to the trustees on the one hand and his personal loyalty to some political ideal or economic theory on the other, should resign his position and terminate his contract honorably. We have it on good authority that no man can serve two masters.

It seems that Mr. Aberhart, the new Premier of Alberta, has been advising the school teachers of that Province to undertake the task of instructing their pupils in the principles that underlie the Aberhart economic and social gospel and the political theories which form the Aberhart party creed. The significance of this episode can hardly escape the notice of the most careless observer. From the earliest periods of our history it has been a clearly understood and almost universally accepted principle in the public life of the Dominion that the schools should be utterly free from "political" influence. The Canadian people adopted the principle that the administration of local school affairs should be entrusted to the care of a Board of Trustees especially elected and quite distinct from other elective municipal bodies. Even during periods of very bitter political rivalry between contending parties when the spoils of office were distributed among party workers, there was always a part of the civil service which rarely suffered from this kind of warfare, namely the Education Department. Yet here we have the spectacle of the Premier of Alberta deliberately urging teachers to turn their schools into juvenile political seminaries.

Some school reformers have denounced the "old line" parties as out of date, inefficient, corrupt, untrustworthy, and all the rest of it. Nevertheless, the records of the old line parties will be searched in vain for any parallel to Mr. Aberhart's action. No Conservative or Liberal Premier ever attempted to interfere with the schools in this outrageous fashion. Can anyone imagine Mr. Pattullo, for example, either in his own person or by deputy in the person of his Minister of Education, advising a convention of public school teachers to instruct their pupils in the principles of Liberalism as the only political system capable of righting all the wrongs of today? Can anyone imagine Mr. Pattullo's Conservative successor in the Premiership instructing the teachers to explain to their pupils the principles of Conservatism as the only hope for the Empire? It has been the tradition, and an excellent tradition it has been, that neither distinctive party politics nor distinctive denominational theology should be taught in the schools. It is said that the new Dominion Premier, Mr. Mackenzie King, is a sound churchman, a member and adherent of Saint Andrew's, Ottawa, an institution in the right historical tradition of the ancient Established Kirk of Scotland. What would the astonished people of Canada say if Mr. King, carrying with him all the authority and responsibility of his high position as Premier of Canada, should go before a convention of teachers and advise them to indoctrinate their pupils in the principles of religion as set forth in the Shorter Catechism? Mr. King's supposed action in such a case would be exactly no better and no worse than the actual performance of Premier Aberhart in Alberta the other day.

What Mr. Aberhart has done in public seems to give some color of probability to the allegation that certain political and social doctrines are in fact being surreptitiously taught in our schools at the present time. The currency of such rumors tends to undermine public confidence in the schools. The Minister of Education, as chief responsible school official in the Province, has at his disposal the means of finding out whether the rumors have any foundation in fact. Dr. Welr will do the schools and the public a real service by having this matter investigated.

## SELF-CONTROL

Health and happiness are generally looked on as enviable gifts, whereas the fact is that, to a large extent, they are duties; only we prefer not to recognize this, as it involves such an unpleasant amount of self-control, mental and bodily.—L. H. M. Souleby.

That which is called controlling what is our duty in a particular case is very often nothing but endeavoring to explain it away.—Bishop Joseph Butler.

## Note and Comment

By R. B. D.

Nothing is true according to the laws of the Media and Piazas, which afford the most perfect of all the world's theatres.

Boast not that a day's work brings forth a harvest. For the day's work brings forth a harvest.

When confronted in an argument or unconvinced by facts, an Occidental philosopher will say it will be all the same a hundred years hence. An Oriental philosopher will express the same thought in a single word. If ready writers of letters to the Editor or writers of editorials and of columns were to keep that philosophical observation in mind, they might save themselves from a peek of labor and worry and readers from a maze of doubt and bobbing about on a wave of perplexity. It is said that time proves the truth or the substance of all things; that truth is mighty and must prevail, and that anything which is not established on the principle of right and truth cannot stand.

But nothing will be the same a hundred years from now except eternal principles. Many things will not be the same a year or two from now. Bubbles have been blown which will be burst in a year or two from the present time; political bubbles and economic bubbles will have collapsed in a year or two from now, leaving not even a shadow behind them. So why not forget some of the pointless controversies of the present time and leave them to the test of time? If there are blind leaders of the blind, a pit of oblivion is waiting to swallow them up.

We saw something in a contemporary today which emphasized the truth that things will not be all the same a hundred years from now. A hundred years ago a movement was organized for the establishment of a line of steam packet ships to ply between Liverpool and New York. Such a project predated a revolution, and a revolution of any kind is something which should not be contemplated without the most serious consideration. We believe that at the time a revolution in navigation was contemplated a packet which was a composite between steam and sail already had made a voyage between a port of Canada and a port in Great Britain. That sturdy ship had survived the test of experience, so that the enterprising revolutionaries had some facts to justify their hopes.

Still there were doubts respecting the practical feasibility of navigating the Atlantic by steam power. One of the newspaper commentators of the time pointed out some of the obstacles to be overcome. Any steamship constructed for the experiment must be of a capacity of at least eight hundred or a thousand tons measurement or displacement; must be manned by a competent master and a qualified engineer. The latter qualification was important, for the element of fire might be more to be dreaded than the fury of the waves.

One hundred years from then the steam packets have vanished, and their places have been taken by thousands of floating palaces of from twenty to eighty thousand tons plunging all the waters of the earth and stimulating the business of all the nations. Human nature may be the same a hundred years from now, but everything else will be different. There are revolutions in progress which may make the great steamships afloat and being constructed today obsolete as the tiny packets which preceded the gigantic floating palaces.

The great Queen Mary, in course of time may prove to be as far behind the times as the Great Eastern was ahead of the times. One of the elements has been conquered and submitted to the practical purposes of mankind. Invention and daring men are now engaged in the task of conquering and subduing an element which is not so substantial as the water. The air is the next element to be attacked and subjugated, and who shall say that the genius and enterprise of men is not equal to the task? We believe it was old Mother Nature, who predicted in the age of the wood and sail packets that the time would come when "iron on the water" would float as easily as a wooden boat. Iron and steel have been riding the waves more buoyantly than wood for more than a generation, and in this generation there are steel ships soaring in the air, and gradually extending their area of navigation to the uttermost parts of the earth.

Of course there are the hazards of the air and accidents to the ships of the air—but there were accidents to the ships of the water in the days when ships were crude and navigators incompetent or reckless. Daring men at all periods of invention and development "load their lives in their hands" and unfurling sails stared consequences in the face. For that matter we all do the same thing when we venture upon the roads in motor cars one hundred years from the day when our forefathers were debating the construction and operation of steam packets. Stranger things than the

THE COLONIST IN LONDON

bursting of silly human bubbles will be seen by the children of a hundred years hence.

## Tides at Victoria

Time of tide (Pacific standard time) at Victoria, B.C., for the month of November, 1935.

Date	High Water	Low Water	Time	High Water	Low Water
Nov. 1	10:00	4:00	11:43	10:00	4:00
Nov. 2	9:46	3:50	11:30	9:46	3:50

## CULBERTSON on CONTRACT

By Ely Culbertson

World's Champion Player and Greatest Card Analyst

Proper technique at contract bridge, as in every other game or sport, is the first necessity for mastery of the game, but the mere technician can never rise to the rarified atmosphere of the topmost heights. The true master of the game is one who has a large quantity of mental "technique" which has little to do with the mere mechanics of the game and in which shrewd appraisal of one's opponents bulges importantly. The timely use of double crosses will pull more chestnuts out of the fire than an elementary grand coup. Of course, once the correct appraisal is made, results still depend upon the proper application to the case in point. Opportunities for such analyses occur dozens of times in the average bridge session. Whether, as declarer, it involves "reading a lead," or, as defender, inducing the wrong finesse, the principle is the same, and the expert derives his supreme joy from his "personality" coups.

For instance, you are playing against a master player and he opens the ace of diamonds against your four spade contract. The dummy goes down with the ♠ Q 10 6 and your own hand also contains three small diamonds. After the ace a small diamond is led. For if it is, should you play from dummy? The queen! Don't misunderstand me. I give you no guarantee that it will win the trick. But I can warrant that the ten will not. The opening lead was not from A-J-K. Such a blind opening would be unthinkable in a good player.

But suppose the leader, in your judgment, had gone just far enough in bridge to have learned that, holding A-K of a suit, the proper opening is the king. Then his lead of the ace pretty definitely denies the possibility of his holding the king as well, and your proper second play is, of course, the ten.

Similarly, on the defense, you hold the queen of suit in "chummy dummy" shows K-J-10. Another suit is led to which you cannot follow and you have a choice of discards. Should you discard a small card from your queen? It depends entirely upon your estimate of the exact bridge psychology of the declarer, and more difficult to determine, his estimate of yours. These gradations of judgment are infinitely subtle and, for that reason, one of the most fascinating phases of "high strategy" Pure "guesses" at bridge are much rarer than in popularly supposed.

## NEVER SAY DIE

The most hopeless hand may become a powerful weapon in the hands of a player who doesn't know what surrender means. In today's hand Ed used a deuce, a three, and a five spot to show his partner the winning defence against a slam.

## Women Studying Many Aspects of Modern Problems

Mrs. W. G. Wilson Reviews "Aftermath of Election" and Mrs. Harold Campbell "Recent Scientific Inventions" at Y.W.C.A. Current Events Group—Changes Mooted

UNDER the combined titles of "Aftermath of the Election," dealt with by Mrs. W. G. Wilson, and "Some Recent Scientific Inventions," reviewed by Mrs. Harold Campbell, the Y.W.C.A. weekly current events hour, yesterday afternoon, was crowded with interest for the capacity audience.

Introducing her subject with the question: "In what way, if any, was this election different from any other ever held in Canada?" Mrs. Wilson arranged her material in the form of answers.

First, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Second, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Third, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Fourth, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Fifth, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Sixth, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Seventh, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Eighth, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Ninth, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Tenth, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Eleventh, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Twelfth, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Thirteenth, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Fourteenth, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Fifteenth, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Sixteenth, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Seventeenth, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Eighteenth, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Nineteenth, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Twentieth, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Twenty-first, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Twenty-second, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Twenty-third, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Twenty-fourth, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Twenty-fifth, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Twenty-sixth, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Twenty-seventh, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Twenty-eighth, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Twenty-ninth, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Thirtieth, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Thirty-first, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

Thirty-second, she cited the number of parties, two old, two new and one "middle-aged," represented by hundreds of candidates who, in defeat, pointedly illustrated the old axiom that "where many battle, many are slain." So many parties, so many candidates, gave rise to great confusion in the public mind, and, as a result, the Liberal party, which had been the dominant force in the past, was defeated.

scientists considered the greatest invention of all time, had been applied to all forms of transportation, the latest being a combination of automobile and rail car.

The comparatively recent invention of the light-beam, in connection with the control of motor traffic and prevention of accidents, was also cited. Another recent experiment, made with a view to allaying the dust nuisance, was the surfacing of streets with a salt preparation which attracted moisture and did away with the necessity of hilling.

**FOOD INVENTIONS**  
Some recent food inventions were dealt with. Research students were working to discover means of making agriculture profitable to the extent that it would support an extensive rural population and at the same time supply the rest of the population with food. Among the feeding methods recently invented was that of Dr. Emmett Holt, whereby olive oil and egg yolk could be injected into the blood, and another invention for treating certain diseases by injecting animal manure into the veins for treatment of boils and septicæmia.

**FAIRER PRESS**  
The increased fairness of the press, the candidates and the public to the men on the opposite side was also commented on. The recent campaign had been distinguished by the comparative absence of recrimination in the press right across Canada. One of the splendid things was the attitude of the leaders themselves, the defeated candidates hurrying to extend congratulations to the successful ones. This was in marked contrast to the conditions fifty or sixty years ago, when the burning of an effigy of the defeated candidate by the victors was no uncommon event, and opposition meetings gloried in making conditions as unpleasant as possible for each other.

**USE OF RADIO**  
The extensive use of the radio in the recent election was also unique. This had helped women, who hitherto had depended for their political information on what they heard discussed in the home or what they read. All they had to do in the last election was to take their knitting, turn the dial and listen in. This had the double advantage of comfort and impartiality, as without embarrassment one could "attend" the meetings of even the party opposed to one's convictions. The time would eventually come, thought the speaker, when political campaigning would all be done by means of radio, dispensing entirely with the need of public meetings and public speaking.

**RECENT INVENTIONS**  
A second veryable talk was given by Mrs. Campbell in her review of some recent scientific inventions. She confined herself chiefly to inventions that "make life easy," approaching the subject by comparing the conveniences available to the modern housewife to the condition of half a century ago or less. Electrical equipment of various kinds had greatly eased housekeeping conditions. The electric companies and various other industrial concerns employed research men the year round in their laboratories inventing or improving appliances of various kinds.

**TRANSPORTATION**  
Among the departments of life that had been benefited by invention were transportation by land and sea and air. The invention of the motor car was one of the first inventions that made it possible for sailors to go beyond sight of land. More than 100 years ago the steamboat arrived; thirty years ago the internal combustion engine, then still later the Diesel engine. Then came the airplane, ever developing more and more possibilities for travel. The invention of the wheel and axle, which some

sciences considered the greatest invention of all time, had been applied to all forms of transportation, the latest being a combination of automobile and rail car.

The comparatively recent invention of the light-beam, in connection with the control of motor traffic and prevention of accidents, was also cited. Another recent experiment, made with a view to allaying the dust nuisance, was the surfacing of streets with a salt preparation which attracted moisture and did away with the necessity of hilling.

## FOUR CASES AT COMING ASSIZE

Criminal Offences Alleged Are of Serious Character, Docket Shows

The Fall Assizes will open here Monday morning at 11 o'clock, with Mr. Justice H. B. Robertson presiding, when four persons, accused of criminal offences, will be placed on trial before His Lordship and the jury of the county of Victoria. The assizes should be concluded within two weeks' time. The Crown will be represented by Carey Martin.

John Pince, of this city, is charged with murder. It is alleged that on May 1 in the early morning he shot and killed Clarence N. Pappas, restaurant proprietor, in Victoria, as the latter was about to enter his home. The accused will be defended by H. W. Davey.

Francis R. Findlay, charged with manslaughter arising out of the death of Mr. and Mrs. W. Y. McCarter following an automobile accident on Hillside Avenue, on Sep-

tember 29, will also be placed on trial. The accused, in this case, will be represented by H. A. Beckwith.

**ROBBERY WITH VIOLENCE**  
William Baker is charged with robbery with violence, being accused of being one of two persons who robbed the home of Mrs. Margaret Scott, in Saanich, on the evening of April 24.

George Bernard is charged with having retained possession of a safe and its contents, the property of D. O. Cameron, of this city.

Sheriff H. W. Goggin has notified all jurors called to serve at the coming assize to be present at the court house, before 11 o'clock, Monday morning to answer to their names when the list is called.

A special meeting of the City Council probably will be held on Monday afternoon to decide on three or four projects that work can be started on immediately under the \$100,000 loan from the Provincial Government for relief work.

Mayor David Leeming and Alderman T. W. Hawkins interviewed members of the Government yesterday, and following the conference Alderman Hawkins announced that the way had been cleared for the city to choose what projects it wanted most from the list presented to the Government.

This means the city can embark on several works immediately just so long as the costs do not exceed the \$100,000 loan.

The council meeting on Monday afternoon probably will be preceded by a meeting of the public works committee. It is expected that the

Oaklands auditorium and Macdonald Park grandstand will be authorized, together with several drainage works.

Wednesday—Royal Oak Young People's Association, St. Michael's Church Hall, Speaker, Freeman Brown.

Thursday—Minnie Eason Bible Study Circle, 1019 Southgate street, 2:45 p.m.—Speaker, Mrs. O. A. Brake, "Speaking Across Canada."

Pessimist—Cheerful! How can't be cheerful when every bone in my body aches?

Optimist—Well, you might at least be thankful that you are not a Tuesday—Victoria and—District hearing.

Association, Foresters' Hall, Corn Grant Street, Speaker, Mrs. G. H. Altire Coley, "The Romance of the Israel Law."

## COUNCIL MAY MEET MONDAY

Special Session Called to Authorize Several Relief Works Out of Loan

A special meeting of the City Council probably will be held on Monday afternoon to decide on three or four projects that work can be started on immediately under the \$100,000 loan from the Provincial Government for relief work.

Mayor David Leeming and Alderman T. W. Hawkins interviewed members of the Government yesterday, and following the conference Alderman Hawkins announced that the way had been cleared for the city to choose what projects it wanted most from the list presented to the Government.

This means the city can embark on several works immediately just so long as the costs do not exceed the \$100,000 loan.

## SAANICHTON IN BADMINTON WIN

Sweeping the women's doubles, breaking even in the men's doubles and then holding the upper hand in the mixed competition, Saanichton took the decision over Hillcrest Club in a fifth division match in the Lower Island Badminton League this week on the suburban courts. Results, with the Saanichton players first mentioned, follow:

**Women's Doubles**  
Misses McMillon and Smith won from Mrs. Erickson and Sarah Underwood, 15-5.  
Misses McMillon and Smith won from Misses Hatfield and Colbert, 15-10.  
Misses Book and Crookes won from Mrs. Erickson and Sarah Underwood, 15-6.  
Misses Book and Crookes won from Misses Hatfield and Colbert, 15-12.  
**Men's Doubles**  
Oakes and Whiteaker lost to Worwick and Phillips, 9-15.  
Oakes and Whiteaker lost to Fraser and Wright, 0-15.  
Wright and Derrinberg won from Worwick and Phillips, 16-10.  
Wright and Derrinberg won from Fraser and Wright, 15-6.  
**Mixed Doubles**  
Miss McMillon and Wright won from Mrs. Erickson and Fraser, 15-12.  
Miss McMillon and Wright won from Miss Colbert and Wright, 15-9.  
Miss Crookes and Oakes won from Miss Hatfield and Worwick, 16-16.  
Miss Crookes and Oakes lost to Miss Underwood and Phillips, 8-15.  
Miss Book and Whiteaker lost to Mrs. Erickson and Fraser, 14-17.  
Miss Book and Whiteaker won from Miss Colbert and Wright, 15-12.  
Miss Smith and Derrinberg won from Miss Hatfield and Worwick, 15-9.  
Miss Smith and Derrinberg lost to Miss Underwood and Phillips, 12-15.

## Maroons Tackle Ramblers Squad

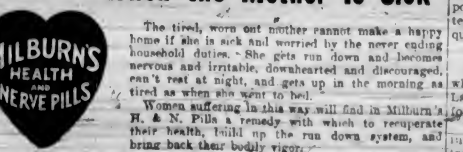

WINNIPEG, Nov. 1.—Montreal Maroons of the National Hockey League, linked by defeat, will make their second bid tomorrow night to score a win over Philadelphia Ramblers, of the Canadian-American League, in an exhibition hockey game here. Ramblers stepped off the ice with a 3-1 victory after the first game.

In a determined drive to reverse the scoring record, Tommy Gorman's Stanley Cup holders went through two heavy workouts today, while Herb Gardiner's Ramblers concentrated their preparations to one stiff practice.

## No Happiness In the Home When the Mother Is Sick

The tired, worn out mother cannot make a happy home if she is sick and worried by the never ending household duties. She gets run down and becomes nervous and irritable, downhearted and discouraged, can't rest at night, and gets up in the morning as tired as when she went to bed.

Women suffering in this way will find in Milburn's R. & N. Pills a remedy with which to reorganize their health, build up the run down system, and bring back their bodily vigor.

# Lloyd George Is Bitter in Attack On Gov't Policy

George Lansbury, Herbert Morrison, J. H. Thomas and Sir John Simon Heard by Audiences in Various Parts of England—Foreign Policy to Fore in Campaign

LONDON, Nov. 1.—David Lloyd George, former Prime Minister and once leader of the Liberal Party, took his turn at the microphone tonight in the election campaign and again attacked the Government's foreign policy.

Discussing the Italo-Ethiopian conflict, he said: "Such attenuated sanctions as have been adopted after six weeks of war are a mockery to the covenant of the League of Nations."

"British Ministers went into the conference with divided purposes and have been outmaneuvered by the resolute and astute men, Signor Mussolini and M. Laval completely fooled them all around."

Lloyd George made public the preliminary results of the questionnaire addressed to all candidates by the council of action for peace and reconstruction. The little Welshman has been closely associated with this organization.

SENT TO ALL CANDIDATES  
(The council's peace platform was sent in questionnaire form to candidates of all parties.)

League action to sever communications between Italy and East Africa to halt the campaign in Ethiopia; a five-year armistice; to settle territorial and economic problems of the post-war world; reduction of tariffs; and reconsideration of mandates; and strict international control of the arms traffic.

OF 700 replies, more than 290 got the approval of the council and thereby qualify for its full support in the campaign. They include 137 Liberals, 127 Labor candidates, and twelve Conservatives.

The situation is complicated, however, by the fact that in twenty constituencies approved Liberal and Labor candidates are opposing each other, and in two others both Labor and Conservative candidates pass the test.

Throughout the country speakers took the stand to decry the record of the Government.

LANSBURY SPEAKS  
At Stately in Derbyshire, George Lansbury, former leader of the Labor Opposition in Parliament, appealed fervently for support and for religious unity against war.

"Let us go back to the fundamentals of our religious faith," he urged. "Gentile, Jew, Buddhist, Mohammedan—let us call to Mussolini, Japan, Germany, America, the whole world, to go to Geneva to Jerusalem, the house of religion, and then confer in the spirit of the Great Master."

Sir John Simon, Home Secretary, and leader of the National Liberals, has taken the unprecedented step of having leaflets appealing for support of the Liberals translated into Welsh for the benefit of 10,000 people in that Principality not speaking English.

So far only two Communist candidates have appeared, one in Wales, the other in Scotland.

WINSTON CHURCHILL  
Winston Churchill at Cambridge, again referred to German rearmament and said Britain must quickly rearm in the face of the Reich's preparations.

"Even children in German schools are taught to think of the glories of war and the glories of conquest, the duty of dying for the Fatherland," he said.

Instead of being inaccessible, this country will become the most vulnerable, he warned. "We are the richest prey to the foreign marauder. London is a great fat cow that soon will be at the mercy of the nearest foreign dictator."

HERBERT MORRISON  
Herbert Morrison, leader of the London County Council, in a speech at Hackney, challenged Neville Chamberlain, Chancellor of the Exchequer, to answer the question: "How much more money do you promise to spend upon armaments, and how do you propose to raise it?"

Morrison has been mentioned as a candidate for the Premiership if Labor should be returned to power. Clement Attlee was appointed Party last month, but if the election the members would have another opportunity to choose a leader in the House, who would become Prime Minister.

J. H. THOMAS  
J. H. Thomas, Dominion Secretary, briefly descended upon the Spent Valley tonight. He left his own hard-fought field in Derby to give a helping hand to Sir John Simon. And the industrial workers who crowded the little temperance hall at Birnall received him with many cheers, but with more interruptions.

Thomas talked appreciatively of liberty, freedom of speech and justice. He saw democracy threatened. The Dominion Secretary said ministers at Seaham had refused to lend their hall to Ramsey MacDonald. He asserted that such tactics would end by leading everything that was best in public life to headlong disaster.

But the interruptions continued. One front-row heckler had such a running commentary that it was difficult occasionally to determine who was making the speech.

Finally, Thomas, with a significant wave of the hand towards a policeman, told the persistent interrupter that he could either keep quiet or be put out.

ONE OF THE REPEATED questions was whether Thomas considered the last Labor Government was responsible for the financial crisis of 1931. "To this degree," Thomas returned, "a nation is no different from an individual. If an individual

is asked to pay for a party he has given, he is responsible. A nation is no different from an individual. If an individual

is asked to pay for a party he has given, he is responsible. A nation is no different from an individual. If an individual

## City and District

Roof Fire—The fire department was called out at 6 o'clock last evening to a roof fire at 471 George Road. Damage was slight.

Chinook Club—The Chinook Club, an organization of fishing enthusiasts, met last night to discuss arrangements for its annual banquet.

Ratepayers' Executive—A special committee meeting of the Victoria Ratepayers' Association will be held on Tuesday next at 8 o'clock at the City Hall. As matters of importance to be considered, all executive members are asked to attend.

Liberal Meeting—The Ward Three Liberal Association held a meeting last night to discuss matters affecting the general welfare of the organization, and also matters pertaining to the annual meeting of the Victoria Liberal Association.

Out of Town—Four members of the Provincial Government were out of town yesterday on departmental affairs, including Messrs. Pearson, Gray, MacDonald and MacPherson. Premier Pattullo and remaining members of the Government held a routine executive meeting.

Credit Grants to Meet—Col. H. E. Goodman, one of the newer members, will be the speaker at the Credit Grants' Association's next meeting. The meeting will take place in Spencer's dining-room on Tuesday at 12:10. Col. Goodman's address will be headed "Trends in Retail Merchandising."

Building Permit—The city building inspector yesterday issued a permit for remodeling the former Vetter home, 238 Douglas Street. The residence will be made into four apartment suites for S. Coxworth, of 240 Wildwood Avenue. Cost of the work will be \$3,500.

Month's Total—City building figures for the month of October

## BRUINS SET BACK CANADIENS, 5-2

HALIFAX, Nov. 1.—Boston Bruins defeated Montreal's flying Frenchmen again tonight with a 5-2 victory, the second game of their pre-season hockey tour through the Maritime provinces.

Three thousand fans saw the Bostonians clearly outplay the Canadiens through the sixty minutes and outscore them in every period but the opener, when the honors were divided. And in one period they watched Red Burroughs and Earl

Two of Boston's goals came from the stick of the right-winger, Charlie Sands, and he was credited with an assist on a 3-1 D. Clapper. Money, who was an "E" and "D" and "Jenkins accounted for the other three.

For Les Habitués, Defenseman Walter Buswell, and Wildor Laroche, on the first-string forward line, found the net behind Tiny Thompson.

## Aussies Chalk Up 165 Runs for Six Wickets at Perth

PERTH, Australia, Nov. 1.—Replying to the Marylebone Cricket Club's first innings total of 344, West Australia today had scored 165 runs for six wickets when stumps were drawn at the end of the second day. The match is the first of the M.C.C.'s tour of Australia and New Zealand.

Dennis Smith, Derbyshire, was the visitors' top scorer with 83.

## AMERKS DEFEAT DETROIT WINGS

WINDSOR, Ont., Nov. 1.—New York Americans, with just enough age on the lineup to be effective, in this instance at least, defeated Detroit Red Wings, 4-2, in an exhibition hockey game here tonight. About 1,500 saw the two National League teams in action.

The New York scoring was done by such young chaps as Lorne Carr, Art Chapman and Tommy Anderson, but it was the veterans, Bill Broder, Manager Red Dutton and Harold Cotton, who kept the Red Wings from scoring.

## OXFORD MINISTER BOUND FOR CHINA

Rev. Geoffrey Allen, B.A., former chaplain of Lincoln College, Oxford, addressed a meeting on Christian principles of the Oxford Cup Movement last evening at First Baptist Church. Mr. Allen is on his way to Canton to take up a pastorate under the Bishop of Hongkong. Jack Hinton introduced the speaker.

Mr. Allen said that true religion centred upon seeing, thinking, suffering, forgiving and extension of mercy. Judgments of blame, he stated, must be changed to judgments of mercy, with the desire to help and reform. Urging those present to look beyond labels, parties and denominations, he asserted that forgiveness led to Christian fellowship.

REGINA, Nov. 1.—Saskatchewan's new Cabinet was sworn in tonight, with the return of Government in the hands of Hon. W. J. Patterson, who succeeded Hon. J. G. Gardiner in the Saskatchewan Premiership.

The new Cabinet was sworn in today by Lieutenant-Governor Munro. Thus Mr. Gardiner was left free to leave for Ottawa immediately to take over his new duties as Federal Minister of Agriculture.

**HOLDS TWO PORTFOLIOS**  
All members of Mr. Gardiner's Cabinet were again given their portfolios, with the exception of Mr. Patterson, who, in addition to being Premier, will also be Provincial Treasurer.

His former portfolio of Minister of Natural Resources may be combined with those of another department. He would make no statement in this connection, but there was also a report that W. F. Kerr, M.P.P. Regina, might be invited to take over Mr. Patterson's former Cabinet job.

**LIST OF MINISTERS**  
The ministers were sworn in in the following order: Hon. J. M. Ulrich, Minister of Health; Hon. T. C. Davis, Attorney-General; Hon. George Spence, Minister of Public Works; Hon. C. M. Dunn, Minister of Highways; Hon. R. J. M. Parker, Minister of Municipal Affairs; and Hon. J. G. Taggart, Minister of Agriculture.

Making the occasion of unusual interest was the presence of Walter Scott, first Premier of Saskatchewan, who took office in 1905 and now a resident of Victoria. With him stood Mr. Gardiner.

**Early Morning Fire Consumes \$500 Houseboat**  
Fire, of unknown origin, early yesterday morning, destroyed a houseboat near the Royal Victoria Yacht Club, Cadboro Bay. It was owned by James Bartwell, Elk Lake, police said, and the loss was estimated at approximately \$500.

Firemen were called to extinguish a basement fire at 1430 Bay Street, about 8 o'clock yesterday morning, and at noon a roof fire occurred at a residence at the corner of Burdett Avenue and Quadra Street.

ANSWER TO YESTERDAY'S PUZZLE

# Social Activities and Notes of Personal Interest

## Hallowe'en Enjoyed at Lake Hill

Hobgoblins, pirates, bull-fighters and old-fashioned ladies mixed in merry medley at Lake Hill Community Hall last evening as the annual Hallowe'en party sponsored by the Lake Hill Women's Institute.

About 200 children of all ages and in fancy dress, and seventy-five grown-ups composed the happy gathering, which gained admission by making a donation of jam, groceries, fruit, vegetables, canned supplies or other gifts, suitable for the Queen Alexandra Bazaar. A useful little sum of money was also donated, in addition to a tableful of package gifts.

The fun, which lasted from 5 to 9 o'clock, was particularly enjoyable for the young folk. After a playtime of about an hour's duration, all the children formed into a grand march at 6 o'clock, several circles of the hall concluding when they all trooped downstairs for supper, a delectable feast served at long tables effectively decked with black and orange trimmings. During the grand march the judging of the costumes took place, the judges being Mrs. J. L. White, of Victoria Institute; Miss Oldfield, of Royal Oak, and Mrs. W. Tasson, of Victoria Institute. Later in the evening, after the delightful programme given by clever amateur musicians and elocutionists, the prizes were presented to the winners of the best costumes in the several classes, as follows:

**BEST COSTUMES**  
Best costume, six years and under—David Francis, dressed as Autumn leaves.  
Seven to ten years—Joy Deacon, Colonial girl.  
Eleven to thirteen years—Marcus Grant, Spanish cavalier.  
Thirteen years and over—Pat Milligan, pirate.

## Wins I.O.D.E. Scholarship

Special Hallowe'en costume—Mary Edwards.  
Special for best comic costume—Jack Gwill, cook.

About fifteen competed in the amateur contest, the winners in which were finally announced as being Dolores Grant, for her spirited Highland dance, and Barbara Oakley, who recited "Tim in Bed".

Others taking part in the entertaining programme were Gloria Simmonds, piano solo; Jerry Lamb, special; Mary Burkmar and Marjorie Chalmers, vocal duet; Jack Gwill, song; Edna Dawkins and John Pendray, piano duet; Jean Currie, recitation; and Alexis Garrelle, Muriel Mercer, Phemia Glover and Mary Edwards, piano solos. Gordon Robson made an excellent chairman for this part of the proceedings as well as for the singing and games that followed. The Misses Robinson judged the amateur contest, and Mrs. J. Finlay, the president, presented the prizes.

All the details were admirably worked out. Mrs. A. Porter, general convenor, having the assistance of a strong committee, and Mrs. T. Simmonds, convening the refreshments. Supper was served for the grown-up guests also, the tables being set in the institute rooms and prettily decorated with bronze chrysanthemums.

### Keating

Mr. W. McNally and Miss Violet McNally entertained a few friends at their home, Veynes Road, on Tuesday evening. Three tables of bridge were in play, the high score being won by Mrs. A. Guy and Mr. W. McNally. Refreshments were served by the hostess, assisted by Mrs. H. Lawrie and Mrs. W. Thorne. Those present were: Mr. and Mrs. H. Lawrie, Mr. and Mrs. W. O. Wallace, Mr. and Mrs. Alex. Sutcliffe, Mr. and Mrs. W. Thorne, Mr. and Mrs. W. Kersey, Mrs. A. Guy, Miss Violet McNally, Mr. B. Hoole, Mr. W. Deeringberg and Mr. W. McNally.

## Wins I.O.D.E. Scholarship

—Photograph by Robert Port Studios.

**MISS ELIZABETH M. HALLEY**  
The Provincial Chapter of the Imperial Order Daughters of the Empire announce the award of its Post-Graduate Overseas Scholarship of \$1,400 to Miss Elizabeth M. Halley, of Salt Spring Island, a member of the teaching staff of St. Margaret's School, Victoria. Miss Halley has a B.A. and an M.A. degree from the University of British Columbia, and has been employed in the I.O.D.E. office since 1931. She was awarded a year's fellowship at Northwestern University, in the autumn of 1936. Miss Halley will enter Newnham College, Cambridge, where she will carry on further research.

## Social and Personal Notes

**Entertains Juveniles**  
The juvenile branch of the Eurydice Art Club were the hosts of a most enjoyable party on Wednesday, the occasion being the birthday of the president, Jean Ray. The reception rooms were decorated in the Hallowe'en motif and gay with festoons, streamers, pumpkins and witches. The twenty-seven guests all sat down to refreshments at pretty table decorated in the same color scheme of black and orange. Music and evening's entertainment took the form of impromptu concerts and games, under the supervision of Mrs. W. G. Frampton, who is at present instructing the children in two plays, which they are planning to present at their next regular meeting on November 16, and at Christmas. Mrs. Frampton received her training at White Plains College, London, England, and has obtained her trained teacher's final certificate. Among those present were Jean and Flore Ray, Illice Roskelley, Eva Aldridge, Dorcas Parker, Betty-Jean Elsworth, Dorothy McVie, Jean Parker, Beverly Clarke, Netta Hunter, Barbara McVie, Mavis Natrass, Cecilia Christian, Eva Lind Hunter, Phyllis Frampton, Freda Natrass, Mimi Bailey, Sylvia Birkel, Grace and Muriel Henry, Jean Lewis, Irene Birkett, Barbara Munro, Ernest Silver, Kenneth and Lloyd Klesinger and Robin Wood. Assisting in serving the refreshments were Mrs. W. B. McMichael, Mrs. H. Jackson and Tom Coventry.

**Hallowe'en Party**  
Mr. Jack Trace, Jr. was host at a Hallowe'en party at the home of his parents, Mr. and Mrs. J. Trace, on Thursday evening. After a "scavenger" hunt, supper was served. The guests were: Misses Irene Williams, Eve Lytton, Helen Peden, Helen Watson, Daphne Holmes, Beryl Wharton, Valerie Swan, and Messrs. J. Gray, Richard Stuenkel, Dick Hoyle, Peter S. Stuenkel, Arthur Jackson and Tom Coventry.

**Reunion Dinner**  
A family reunion dinner was held at the Empress Hotel last evening in connection with the visit here of Mr. and Mrs. Thomas S. Gore of Mexico City. Covers were laid for ten, the other guests being Mr. and Mrs. Thomas Gore, of Victoria; Eleanor Hirst, Mrs. S. Hirst, Miss Eleanor Hirst, Mr. Cecil Gore, Mrs. David Kerr and Mr. Arthur Gore.

**Back From Shawigan**  
After spending the summer at their country home, "Rockvale," Shawigan Lake, Mrs. Gordon Hunter and Mrs. Harry Morden have returned to their town home, 127 Beville Street, for the winter. Mrs. Harry Morden, who has been with them at "Rockvale" for the past fortnight for his annual holiday, left on Friday for Vancouver.

**Surprise Party**  
A surprise party was held on Monday evening at the home of Mr. and Mrs. J. Norman Ford, Wilson Street, when the members of the Equatorial Community Club met to congratulate Mr. and Mrs. Ford on their recent marriage. Mrs. J. Quinn, president of the club, presented a gift from the members, accompanied by the food which the assembled guests, singing and old-time dancing were enjoyed. Among those present were: Mr. and Mrs. J. Bannard, Mr. and Mrs. R. McVie, Mrs. J. R. Ford, Mrs. J. Norman, Mrs. T. Bugden, Mrs. H. Dunne, Mrs. H. Roode, Mrs. Vesper, Mrs. T. Robinson, Mrs. T. Wallace, Mrs. W. Deauville, Mrs. Parker, Mrs. A. Draper, Mrs. C. Senner, Mrs. W. Aldridge, Mrs. E. Mitchell, Mrs. H. C. Silburn and Miss E. Thain.

**Miscellaneous Showers**  
Mrs. J. H. Francis and Miss Kitty Rivers entertained recently at the home of Mrs. R. W. Hurst, Bay Street, with a delightful miscellaneous shower in honor of Miss Ruth Rivers, whose marriage to Mr. Clifford Hilton will take place on Saturday.

son, Mr. E. S. H. Winn, K.C. Mr. Parker, Williams, Mr. R. B. Fulton, Colonel J. J. Fray and Mr. Dan Evans, all of Vancouver.

**Here on Holiday**  
Miss Betty Peel, who is attending Queen Margaret's School at Duncan, is spending a few days holiday in the city with her parents, Mr. and Mrs. G. N. Peel, of Newport Avenue.

**Arriving Today**  
Mr. A. H. Napier Moore, managing editor of Maclean's publications, Toronto, will arrive here today in the course of a business trip and will be in Victoria until Tuesday night.

**St. Mary's Men's Club**  
At a meeting of the St. Mary's Men's Club last night, it was decided to hold a bridge social on Monday, November 25, in St. Mary's Hall, Yale Street, at 8 p.m.

**Back From Vancouver**  
After spending several days in Vancouver as the guest of her sister, Mrs. W. A. Russell, Mrs. R. Murray has returned to her home on Monterey Avenue.

**At Glenisiel Hotel**  
The Cornish Players arrived here yesterday for the presentation of the "Wizard of Oz" this afternoon and evening. The members of the cast registered at the Glenisiel Hotel.

**Resident at Guest House**  
Mrs. Sutcliffe has rented her home on Olive Drive for the winter and will be resident at the Guest House, Oak Bay, during that time.

**Visiting From Calgary**  
Mrs. Fred Hesse, of Calgary, is the guest of Mr. and Mrs. Robert C. Fair, Despard Avenue.

**At Qualicum Beach**  
Mr. and Mrs. P. B. de Mandel, of Honolulu, are staying at the Sunset Inn, Qualicum Beach.

**In Seattle**  
Mrs. Charles E. Wilson, of the Uplands, left recently for Seattle to spend several days visiting friends.

## Subscriptions To V.O.N. Are Most Welcome

The following further subscribers have sent donations to the Victorian Order of Nurses during the present campaign:  
Mrs. Russell Robertson, Mrs. J. B. Clearidge, Mrs. P. E. Taylor, Mrs. H. Heisterman, Mrs. J. N. Taylor, Mrs. P. G. Ellis, Mrs. W. N. Sheffield, Mrs. A. J. Weaver, Bridgman, Mrs. Arthur K. Mitchell, Mrs. Charles Hensley, Miss Saunders, Miss J. C. Toulmie, Mrs. J. O. Wilson, Mrs. M. Dunsmuir, Mrs. G. C. Jones, Mrs. M. A. Hadden, Mrs. W. H. Stone, Miss M. A. Wigley, Mrs. E. M. Harris and Mrs. Nicholson.

## Girl Guide Notes

The Cedar Hill group of the Girl Guides, led by its leader, Miss Jenkins, entertained the mothers at a very pleasant tea, held in the Mount Tolmie C.C.F. Hall, Richmond Road, on Thursday afternoon. The next meeting of the mothers will be held in the C.C.F. Hall, Richmond Road, on Monday at 2 p.m.

## Langford

Jim Merry, who spent the weekend with his parents, Mr. and Mrs. H. Merry, of the Highland district, has returned to Youbou.

Mr. A. F. Bayles, who has been away during the summer months at Northern Reef Mine, B.C., has returned to his home at "Woodstock Farm," Island Highway.

Mr. Robert Ely, of Victoria, has been the guest of Mr. and Mrs. A. A. Forbes-Calland for a few days.

Mrs. E. C. Stewart and her son, Donald Stewart, who have resided in Langford for some time, have left to make their home in Victoria, in the Bell Block, Oak Bay.

Miss Francis Elizabeth Smedley, R.N., eldest daughter of Mr. and Mrs. Smedley, Island Highway, has been called by its leader, Miss Jenkins, entertained the mothers at a very pleasant tea, held in the Mount Tolmie C.C.F. Hall, Richmond Road, on Thursday afternoon. The next meeting of the mothers will be held in the C.C.F. Hall, Richmond Road, on Monday at 2 p.m.

Honoring Mr. Stanley Turner, a former resident of this district, a number of friends paid him a surprise visit recently at the home of Mr. and Mrs. David Ramsay, Heath Drive. Four tables of confederate bridge were in play, the highest score being held by Mr. D. Ramsay, and consolation Mr. G. Phipps. Supper was served by the visitors, the supper table being decorated with a bowl of gladioli and Michaelmas daisies. Mr. Turner will leave this week for Montreal, where he will sail on the Empress of Britain for a three-months' trip to England. The self-invited guests were: Mr. and Mrs. L. O. Wilkinson, Mr. and Mrs. E. F. Le Queune, Mr. and Mrs. H. H. Hince, Mr. and Mrs. T. O. Guy, Mr. and Mrs. Cyril Wilkinson, Mr. and Mrs. D. Ramsay, Mrs. R. M. Ritchie, Miss D. Harrison, Messrs. G. Phipps, S. Turner and K. B. Hince.

**Metochios**  
Mr. and Mrs. Clapham, who have spent the last few months traveling in England, have returned to their home in Metochios.

Mrs. Dixon, of Victoria, has been the guest of Mrs. H. Meredith-Jones, "Rockvale," for the past week.

A careful driver approached a railroad; he stopped, looked, and listened. "All he heard was the car behind him crashing into his gas tank."

## FEATHER IN HER HAT

by JULIE ANNE MOORE

CHAPTER XXIV  
Selma Runbreeker had vanished. A telephone call from Carl the next morning gave Rita, the news, and before noon Senator Runbreeker visited Mollie at The Globe and expressed the fear she had been kidnapped.

The Senator was a sick man, mentally and physically. He told Mollie that if anything happened to Selma he would blow his brains out. And Mollie knew this was not a wild threat; it was a simple statement of fact.

"She was unhappy about Carl," Mollie said, "and in all probability has gone off somewhere to get it out of her system. Nothing will happen to her, Senator."

He recorded various petty events in his life, and Mollie went to see her friend at police headquarters. "All I want," she informed him, "is perhaps a word whispered to one or two of your men. But officially you must do nothing about it."

When Mollie was leaving, the officer gave her a copy of what the police had said was a diary, found in Wells' room. There were twenty-four single space typewritten pages. It was not in any sense a diary but a clumsily written autobiography. When she had read it through, she went back and checked and re-checked passages she found particularly interesting. The portions she checked followed:

"I was born in Madrid, Spain, September 22, 1903. Before I was a year old I was taken to Cairo, Egypt, where my father, a surgeon of some standing, was in charge of a large private hospital. I was always curious about what went on in my father's operating room, and when I was six I climbed up to the top of a small room off the operating room and watched with considerable horror. I must admit, a complete autopsy. It was a full year before I again ventured to return to my secret place. But the interval had given me new courage, and by the time I was twelve years old I had witnessed at least fifty major operations, and several autopsies."

"In time I was not only hardened by these experiences but developed a great eagerness to try my own hand at this fascinating business. During my father's absence from the hospital, I investigated a young neighbor boy into the operating room where I chloroformed him, put off his clothes and had him lie on his back on the table. I was thoroughly whipped, but I think I was forgiven by the discovery that I was disposed to follow his footsteps for after that he frequently talked to me about both medicine and surgery."

"But about this time two events occurred that definitely turned me against any orderly career. My mother, whose own mother had died in an insane asylum, went stark mad and after several months of infinite patience on my father's part was removed to an institution. The second event took place shortly after my mother's confinement. When fighting with a boy about my own age and size, an elder I drew a pocket knife and stabbed him several times in the back. For this I was tried for assault and only my father's plea saved me from a term in a house of correction."

There followed an account of the boy's father's major crime—three years which were spent in a military school. Then, after a year of travel, he was sent to Oxford with the expectation that on his graduation he would begin the study of medicine. "It was generally believed now that I had undergone a reformation, and perhaps I had, for while I had definitely decided long ago not to be a physician, I had also come to realize that the intelligent person does not openly defy society's laws."

"In my third year at Oxford I attended a series of lectures on criminology and was so impressed that I promptly set about writing a book which I called 'The Police Are Puppets.' What I sought to prove was that the modern method of detection was a formula which was so narrow in scope that a half-wit who had enough brains to understand the simple formula could safely commit any number of major crimes and escape punishment. I wrote the book under the nom de plume Dr. Chezzee, and mailed it to a firm of publishers with a note saying I would not be for obvious reasons, reveal my identity, but that they were welcome to the manuscript, gratis if they cared to print it."

"To my surprise, they did publish it and there was an immediate howl of protest, which found expression chiefly in letters to the daily newspapers. And now, stirred by this reaction, I began writing a second book which I called 'The Strange Case of Dr. Chezzee.' This was pure fiction and my only object in writing it was to further irritate those who had been aroused by my first book. It was offered as an autobiographical record of the fictitious Dr. Chezzee, who was then supposed to be living in London, and giving the arguments of his earlier work. Dr. Chezzee was pictured as a man then nearing his eighty-fifth birthday and at least half the book was taken up with an experiment in murder he claimed to have made in Bombay, India, forty years before. He told how he had selected three prominent persons in the city of Bombay, had written each when and under what circumstances he was to die, and then had proceeded to kill them according to specifications. And then, in the person of Dr. Chezzee, I detailed how, since the good doctor had taken care to leave none of the conventional clues without which the police

are invariably baffled, the police had made no headway whatever in their investigation."

Fuhrman then told how, before the book was finished, he was called home because of the death of his mother; how, within twenty-four hours after his arrival, his father suffered a stroke and was dead before morning; how, his decision not to return to Oxford, and of his keen disappointment when he discovered his father had not left him his sizeable fortune outright, but had provided a trust, from which he was to be paid twenty-five hundred pounds a year.

"During the months that I remained in Cairo to await final settlement of my father's estate, I completed 'The Strange Case of Dr. Chezzee.' Returning to England, I mailed my complete manuscript to the publishers of my first book, again concealing my identity. The success of the book was almost instantaneous. More than a quarter of a million copies were sold in the first forty days. Though it was the thinnest fiction, it was received as a true record and rumor had it that Scotland Yard was combing the whole of England for the elusive eighty-five-year-old Dr. Chezzee."

He recorded various petty events in his life, and Mollie went to see her friend at police headquarters. "All I want," she informed him, "is perhaps a word whispered to one or two of your men. But officially you must do nothing about it."

When Mollie was leaving, the officer gave her a copy of what the police had said was a diary, found in Wells' room. There were twenty-four single space typewritten pages. It was not in any sense a diary but a clumsily written autobiography. When she had read it through, she went back and checked and re-checked passages she found particularly interesting. The portions she checked followed:

"I was born in Madrid, Spain, September 22, 1903. Before I was a year old I was taken to Cairo, Egypt, where my father, a surgeon of some standing, was in charge of a large private hospital. I was always curious about what went on in my father's operating room, and when I was six I climbed up to the top of a small room off the operating room and watched with considerable horror. I must admit, a complete autopsy. It was a full year before I again ventured to return to my secret place. But the interval had given me new courage, and by the time I was twelve years old I had witnessed at least fifty major operations, and several autopsies."

"In time I was not only hardened by these experiences but developed a great eagerness to try my own hand at this fascinating business. During my father's absence from the hospital, I investigated a young neighbor boy into the operating room where I chloroformed him, put off his clothes and had him lie on his back on the table. I was thoroughly whipped, but I think I was forgiven by the discovery that I was disposed to follow his footsteps for after that he frequently talked to me about both medicine and surgery."

"But about this time two events occurred that definitely turned me against any orderly career. My mother, whose own mother had died in an insane asylum, went stark mad and after several months of infinite patience on my father's part was removed to an institution. The second event took place shortly after my mother's confinement. When fighting with a boy about my own age and size, an elder I drew a pocket knife and stabbed him several times in the back. For this I was tried for assault and only my father's plea saved me from a term in a house of correction."

permanently discarded. However, it did not continue.

"Out of a clear sky the young woman in question informed me she did not love me. When I tried to discover the cause of this sudden change of heart, she grew angry; she said I was twice her age, which I was not, called me ugly, stupid and ridiculously vain and presumptuous to think that she cared for me. Soon after I learned that there was another man. He was a younger man than I—a man of extraordinary physique and a most fascinating manner."

"For almost a year I suffered in silence. Perhaps I thought that I would ultimately win her over again. I do not know. I know only that it came to me at last that I had lost her. And almost in the same moment of realization I found myself thinking of my experiment in crime again. And now I thought no longer of victims to be selected. The Senator, his son and daughter were ideal subjects for my little laboratory demonstration."

"To give the police every advantage, I decided to follow the plan I had given it in 'The Strange Case of Dr. Chezzee.' Each of my victims was to know what he or she was to be murdered, in what manner, and where his or her body was to be discovered. The son should be stabbed with an ice-pick and his body left in the Speaker's chair in the House of Representatives. The Senator should be thrown from the top of the Washington Monument. . . . But when I came to the daughter, my courage failed me. I must confess I was still in love with her and in the end I decided to defer my plans for her demise until her brother and father had been dispatched."

"My first move to throw the police off the scent was to falsely report my own death by drowning. Mollie was startled by the abrupt termination of this amazing autobiographical sketch, a fact to which she recalled attention when she returned the copy the next morning. The officer shared her feelings in this regard. "Either," he said, "the suddenly decided at that point to kill himself and thereby throw suspicion on the Senator and his son; or," he paused, "as the whole thing is a forgery and was ended as it was to make us conclude what I have just said."

Mollie said after a moment, "If that last sentence had been omitted, I could have believed Fuhrman was the author of all the rest. . . . But when I received the call saying Fuhrman had been drowned in the reflecting pool, he was standing directly behind me and therefore could not have made the call himself."

Made especially for children  
Castoria is made especially for children. Ask your doctor about it. He will tell you that it contains no harsh purgatives, no narcotics—only such ingredients as are suitable for a child's growing body. And children take it gladly. . . . they like its pleasant taste.

Keep a bottle of Castoria always in the house. . . . from the time your oldest child is born until the youngest is 11 years old. Give it for constipation, acid stomach, flatulence. . . . for colic due to gas, for diarrhea due to improper diet, and as the first treatment for colds. The family size bottle is most economical.

90% of all children affected  
Even though your child is "regular," his elimination may not be thorough. 90% of all children, doctors have found, are affected by constipation. Your safest course, when a youngster becomes dull and droopy or irritable and rebellious, is to give a laxative.

But—give a child's laxative. Give Castoria! It will never cause painful

## At the Theatres

### STAGE REVUE IS NOW AT CAPITOL

"Brown Skin Models" Currently  
Produced at Theatre "Special  
Agent" on Screen

Starting today and showing for three days only, a show of exceptional merit, consisting of forty-one entertainers from New York City's Harlem, with its finest colored talent moulded into one of the most entertaining stage companies at present appearing behind the footlights will be presented at the Capitol Theatre.

"Brown Skin Models" is a sensational array of singers, dancers and musicians, and is proving one of the most popular stage shows at present playing in Canadian theatres.

Its producer, Irvin C. Miller, is widely known in theatrical circles as the Ziegfeld of Harlem. He is also musical director and leader of "Brown Skin Models" famous stage band, which is known as "The Delegates of Jazz."

The entire show is a colorful, spectacular presentation, bringing to audiences famous stars of the stage from New York's colored revues and leading vaudeville circuits of the country.

On the screen, the added feature attraction will be "Special Agent" starring Bette Davis and George Brent.

ORPHEUM The great American theatre home, where life begins and life ends, is the setting for Hollywood's latest screen hit. The film is based on none other than Louisa M. Alcott's classic of an old New England homestead, "Little Women," now at the Little Orpheum. Katharine Hepburn plays Jo, the ambitious tomboy who was long in choosing between a career and love.

THEATRE Some of the foibles of the film colony are humorously revealed in the brand new musical romance, "Music Is Magic," current at the Dominion Theatre. Alice Fay and Ray Walker are co-starring in this comedy and song-studded screen production. It all starts when Walker tries to get his sweetheart, Miss Faye, a break in the movies.

COLUMBIA "A Night at the Ritz," the Warner Bros. production now showing at the Columbia Theatre, should prove popular in any centre of Irish population. One of the authors of the comedy is Robert T. Shannon, who has been hand-picked by the man who is the director. Finally, Bill Gargan—the pride of St. Francis Xavier School in Brooklyn—is taking a leading part.

PLAYHOUSE Accused of a murder he did not commit. On trial before a judge who was appointed by a crooked politician who wants the man sent to the gallows. His fate to be decided by a jury that has been hand-picked by the man who wants him killed. That is the situation in which Clark Williams finds himself in Universal's "Transient Lady," now at the Playhouse Theatre, with Gene Raymond, Ray Coulter, Julie Wilson, Bob Ryan and Huil Frances Drake and June Clayworth in the featured roles.

Perfect Rhythm  
Marks Success  
Of Puppet Show

Perfect rhythm is the important thing in putting on a puppet show, according to Ellen Van Volkenburg, who staged "The Wizard of Oz" at the Cornish Players' marionette opera, which will be seen in the Empire Theatre today at 2:30 p.m. and 8:30 p.m.

"A strong beating rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

show," she says. "The puppeteer must have a strong sense of rhythm, and a strong sense of rhythm is necessary to a successful puppet

Every pair of genuine Goodyear welt construction. Splendid grade calf uppers in all styles of lasts and sizes. Brogues, blucher-cut and plain laced types. **3.49**

Street Floor, "The Bay"

### That Body of Yours

(By James W. Barton, M.D.)

#### VITAMINS ARE NECESSARY TO HEALTH

So much is being heard about vitamins now that many may be of opinion that they are very valuable

foodstuffs and that foods containing them should always be eaten.

As a matter of fact, vitamins are not considered foods at all, but rather as certain substances contained in foodstuffs that have a "regulating" effect upon the body. They have thus been called: body regulators, and are, therefore, necessary to good health.

Fortunately they are all found in the everyday food usually eaten by everybody, so that in one sense there

is no need to think about them at all.

However, if the foods containing them are not eaten, then certain ailments result. It is because of these ailments that so much has been heard about vitamins.

Thus a lack of vitamin A interferes with the action of the little cells which make juices on certain surfaces like the eye, so that the eyes cannot resist infection as they should. There is also interference with growth and development, lack

of appetite, indigestion and diarrhoea. The foods rich in vitamin A which would prevent these conditions are: Spinach, green tops of vegetables, cabbage, lettuce, asparagus, potatoes, sweet potatoes, carrots, tomatoes, peas, beans, pineapples, prunes.

If there is not enough vitamin B in the food, there is lack of appetite, indigestion and nervousness. Foods rich in vitamin B are green tops of vegetables, cauliflower, asparagus, potatoes, parsnips, tomatoes, beans,

peas, grapefruit, lemons, oranges, pineapples, prunes.

Lack of vitamin C may cause tooth decay, scurvy and tendency to colds. Foods rich in vitamin C are cabbage, lettuce, potatoes, tomatoes, apples, bananas, grapefruit, lemons, oranges, pineapples, raspberries and strawberries.

Lack of vitamin D means that not enough lime is being taken into the system, so that rickets and decay of teeth may result. Foods rich in vitamin D are butter, egg yolk, milk,

green vegetables, liver and cod liver oil.

By looking over the above foods it will be seen that most of us eat the above foods and usually in sufficient quantity to obtain enough of all the vitamins.

As has been suggested before, perhaps a little more of leafy vegetables and fruits might well be added to the ordinary diet of many people to make sure that sufficient vitamins are taken daily.

### Dragged to His Death By Bandits

NEW YORK, Nov. 1 (AP)—Henry Bron, Catholic missionary at Klatung, Szechwan Province, China, was chained and dragged to his death by Lolo bandits, said reports received here today.

He was seized by the bandits and fastened by a chain about his neck. Then he was dragged several miles until strangled to death.

The brigands abandoned the body which was found later by a searching party.

"One word more and I return to mother—you know what that will cost you."

## WEST COAST BOAT SAILS

Maquinna Away Last Night—Hikawa Maru Due at William Head

Sailing for Port Alice, via ports on the West Coast of Vancouver Island, the B.C. Coast Service of Canadian Pacific Steamships, the Princess Maquinna left the Belleville Street docks at 11 o'clock last night. The Maquinna took out a number of passengers for various points and had a good load of freight aboard.

Coming from Japan ports, the Nippon Yusen Kaisha, the Hikawa Maru is due at the B.C. Coast Service Quarantine station at 3 o'clock this afternoon, according to advice received from the ship by Harry Douglas, local agent of the line. The liner has only a small list of passengers about this trip, there being but forty-three in all classes. For Vancouver there are one tourist and five steerage, and for Seattle seven cabin, fifteen tourist and fifteen steerage passengers.

For Vancouver discharge the Hikawa has 1,670 tons of general cargo, including \$1,500,000 in silver bullion, going to London, and \$500,000 worth of raw silk consigned to New York.

To pick up an exceptionally large shipment of metal amounting to 1,700 tons and one of the biggest apple cargoes this season, the British freighter Ss. Gaelic Star, of the Blue Star Line, is now at the port of New Westminster loading for the United Kingdom and Continent markets.

When the Donaldson Line refrigerated motorship Moveria departs for United Kingdom ports early next week she will have heavy consignments of British Columbia cargo aboard. The Moveria is loading 1,200 tons of metal at New Westminster, and among other items of cargo already aboard are 250,000 feet of lumber, 800 tons of general and a large shipment of apples.

Three motorships now under construction in England for the Reedson Smith Line will come out to the Pacific Coast at approximately monthly intervals, commencing July 1936, according to present plans. The new vessels, as yet unnamed, have been especially designed for the Pacific-United Kingdom trade.

The company has not decided to install refrigeration accommodations. Arrangements have been made, however, so that reefer compartments may be installed if desired.

The three ships, similar to the Houston City and Devon City, familiar ships on this coast, will be 9,500 tons dead weight, with an operating speed of thirteen knots.

**HEAVY DECLINE**  
The strength of the Netherlands merchant fleet has been reduced during the period 1931-35 by over 25 per cent, and this is applicable only to the vessels navigating under a Dutch certificate and does not include those vessels operating under East and West India certificates. The reduction of tonnage for the Netherlands is the greatest in the world, amounting to 16 per cent for the Netherlands and Netherlands India, while the decrease in the total world tonnage amounts to 6 per cent. Now the Netherlands ranks below Norway in shipping, which is not in accord with the relative economic and geographic importance of the two countries.

There may be some few supermen who jump up when they ought to, but most of us crawl out just when we've absolutely got to!

The minister was loud in his praise of the fat and juicy bird, and finally he asked: "Where did you get such a fine goose as that?" "Pardon," replied his host, "when you preach a good sermon, Ah don't care what you get. Ah hope you'll have de same consideration for me."

## Handling Charge Will Be Assessed At Pacific Ports

All the steamship conferences operating to and from the Pacific Coast ports have decided to assess a handling charge at California ports on import and export traffic, the Pacific Westbound Conference has decided effective February 1, 1936. It will no longer absorb handling charges to and from ships' slings at ports in Oregon, Washington and British Columbia.

## UPWARD TREND AT MELBOURNE

Australian Port Handled More Tonnage Last Year Than During 1933

Shipping business of the Port of Melbourne, Australia, shows an upward trend, according to recent reports. The shipping, which entered the port during the year ended December 31, 1934, increased by more than 3 per cent, and imports showed a gain of 16 per cent, but there was a decline in the exports of 6 per cent. The report of the harbor commissioners shows that last year 3,248 vessels, aggregating 12,361,905 gross tons, entered the port, compared with 11,861,317 tons in 1933, and 2,869 and 11,018,208, respectively, in 1932.

The imports from overseas increased from 1,214,460 tons in 1933 to 1,338,050 tons in 1934, and the interstate trade increased from 1,287,036 tons to 1,890,600 tons. The exports at 1,607,293 tons showed a decrease of 107,882 tons, as compared with 1933, due to the falling off in the exports of wheat. The revenue for the year was \$62,820, and the expenditure \$62,844, leaving a surplus of \$2,986.

## FREIGHTER SUNK IN LAKE HURON

Norwegian Vessel Viator Rammé By Motorship Ormida—Chief Engineer Hurt—No Panic

PORT HURON, Mich., Nov. 1.—The Norwegian freighter Viator was at the bottom of Lake Huron today, rammed and sunk, Captain G. J. Steffensen, of the Viator, said, by the Ormida, in a dense fog.

The crew of eighteen was taken aboard the Ormida without loss of life. Captain Steffensen, whose home port is Bergen, Norway, said Norman Petersen, chief engineer, suffered skull and chest injuries. No other members of the crew were injured and all were taken aboard the Ormida without panic. Petersen's condition is not serious, physicians at the General Hospital here said.

**VANCOUVER SHIPPING**

VANCOUVER, Nov. 1.—The Union Steamship Company of New Zealand freighter Limerick is making her first visit to this port and is berthed at Pier "B," loading general cargo. The ship came up the coast from the Panama Canal.

Ms. Akre, ex-Childar, has arrived at Liverpool after a fair voyage according to reports here. She sailed from Vancouver late in August after undergoing extensive repairs at the Burrard Drydock plant.

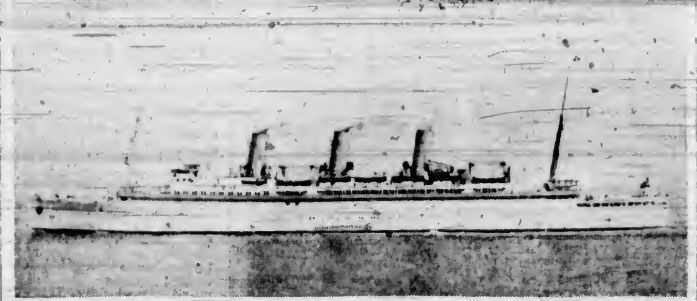

The Empire Shipping Co. Ltd. announced Ms. Fella, of the Italian Line, will sail November 2 for intermediate ports. The French Line Ss. San Antonio is due November 2, to load for Europe. On November 6 the Swedish Ss. Yngaren.

At the Oregon Coast Highway Association meeting at Seaside, it was reported that for the first time the association will carry on a campaign for tourist development, using revenue from the gasoline and road tax for publicity purposes. With \$200,000,000 invested in roads it was estimated that \$10,000,000 was spent by tourists in Oregon in one year, and 22 per cent of the traffic was made up of out-of-state cars. An initial sum of \$50,000 has been voted for publicity campaign, and Harold B. Say, publicity director of the Portland Chamber of Commerce, has been placed in charge.

The minister was loud in his praise of the fat and juicy bird, and finally he asked: "Where did you get such a fine goose as that?" "Pardon," replied his host, "when you preach a good sermon, Ah don't care what you get. Ah hope you'll have de same consideration for me."

The minister was loud in his praise of the fat and juicy bird, and finally he asked: "Where did you get such a fine goose as that?" "Pardon," replied his host, "when you preach a good sermon, Ah don't care what you get. Ah hope you'll have de same consideration for me."

## Outbound Today for Ports in the Far East

Sailing for the Philippines by way of Hawaii, Japan and China, the Canadian Pacific Ss. Empress of Canada, Captain A. J. Hosken, R.N.R., commander, is scheduled to leave Rutherford Piers at 5:30 o'clock this afternoon. The Canada is due at the local dock at 4 o'clock to embark passengers and take on mails and cargo.

The Intercoastal Line Ss. Beranger is due Saturday with a cargo including about 1,000 stems of bananas from Central America.

Ss. Bright Comet, ex-California, built in 1919, will arrive November 2 to the Yamashita Shipping Co. Ltd. to discharge 500 tons of Japanese general cargo. She will load at United States West Coast ports for Japan.

The freighter Ss. Tinsington Court has been named for November sailing to the British West Indies, on the regular run of the Canadian Transport Co. She will begin loading November 22, and her departure will bring the line's sailings from this port to 122.

The Soviet trade delegation at Tokyo is reported to have placed an order with the Mitsubishi Shipbuilding Co. for construction of two tankers of 2,000 tons each, the cost being \$500,000.

## INJURED OFFICIAL IS GETTING BETTER

VANCOUVER, Nov. 1.—Commander J. B. Radcliffe, marine superintendent of Dingwall, Colts & Co., is recovering from injuries suffered when he fell thirty feet through an open hatch on one of the agency ships a few days ago.

## Nanaimo Weather Shows Extremes

NANAIMO, Nov. 1.—A drop of 50 degrees in temperature was the record set up here during the month of October, the report of Lamont Ross, local weatherman, showed today. Nanaimo experienced some of the warmest and coldest days in the city's history.

On October 1 the temperature stood at 72.5 degrees. On October 31 it had dropped to 21 degrees, 11 degrees of frost. Nanaimo experienced 142 hours and 36 minutes of bright sunshine; 1.97 inches of rain, and 1.4 of an inch of snow during the month.

Last night, despite a forecast of warmer weather, the mercury dropped to 19 degrees, 13 degrees of frost.

## ANNOUNCES 1936 PUBLICITY DRIVE

George I. Warren Returns From Attending Tourist Promotion Meetings in South

On his return yesterday from attending meetings of various tourist and publicity organizations as far south as San Francisco, George I. Warren, publicity commissioner, reported Victoria will participate in a joint publicity campaign in the North Pacific Coast on which organizations propose to spend \$18,000.

Mr. Warren explained publicity groups from San Francisco to British Columbia would participate, and arrangements were made for an early conference of the Oregon Coast Highway, the Washington Coast Highway and the Redwood Empire Association.

**TO FEATURE CITY**  
Victoria and Vancouver Island will play an important part in the scheme, Mr. Warren reports, as it was generally recognized that this area has something distinctive to offer to draw tourists to the West. It will be the first time all the tourist units of the North Pacific district have combined for a joint advertising campaign.

At the Oregon Coast Highway Association meeting at Seaside, it was reported that for the first time the association will carry on a campaign for tourist development, using revenue from the gasoline and road tax for publicity purposes. With \$200,000,000 invested in roads it was estimated that \$10,000,000 was spent by tourists in Oregon in one year, and 22 per cent of the traffic was made up of out-of-state cars. An initial sum of \$50,000 has been voted for publicity campaign, and Harold B. Say, publicity director of the Portland Chamber of Commerce, has been placed in charge.

The minister was loud in his praise of the fat and juicy bird, and finally he asked: "Where did you get such a fine goose as that?" "Pardon," replied his host, "when you preach a good sermon, Ah don't care what you get. Ah hope you'll have de same consideration for me."

## THREAT HANGS OVER SHIPPERS

Longshoremen Have Orders To Cease Serving Ships From Gulf Ports

HOUSTON, Tex., Nov. 1.—Threat of a widespread boycott hanging over Gulf port shippers today as the International Longshoremen's Association strike entered its third week.

Joseph P. Ryan, of New York, I.L.A. president, has instructed all I.L.A. members in the United States and Canada to cease serving ships worked by non-I.L.A. labor in southern ports unless the strike was settled by today.

I.L.A. leaders here remained hopeful that the threatened boycott would bring about a settlement of the labor dispute within a short time.

Vessels at most ports in this district were worked with non-union labor. The port at Lake Charles, La., was closed after a fight between strikers and special guards in which two persons were killed. The strike was called after the I.L.A. demanded union recognition at New Orleans and the inclusion of Lake Charles in a new labor contract for this district.

## NOTICE TO MARINERS

British Columbia—Strait of Georgia—Point Atkinson—Automatic radio beacon established. An automatic radio beacon has been established at Point Atkinson. In foggy weather the transmissions of the radio beacon and the sound signals from the fog alarm are synchronized for distance finding.

Position—Latitude N. 49 degrees, 19 minutes and 51 seconds; longitude W. 123 degrees, 15 minutes and 49 seconds. Wave—296 kilocycles (1013 M.).

Schedule of operation—In clear weather half-hourly, commencing two minutes and at thirty-two minutes past the hour, the characteristic VVV and two long dashes is repeated for three periods of one minute, separated by silent intervals of two minutes. In foggy weather, the characteristic outlined below is transmitted continuously for periods of one minute followed by silent intervals of two minutes, synchronization with the fog alarm emissions of the stations taking place at the end of each transmission, as indicated: VVV and two dashes repeated for fifty-two seconds; silence one second; one dash, signal synchronized with the fog alarm, one second; silence one second; one dash, signal synchronized with the fog alarm, five seconds; a total of sixty seconds.

Whenever the fog alarm sound signal is operating, a group of two signal dashes, a short and a long, one second and five seconds, respectively, is transmitted at the end of the radio beacon minute of operation. These dashes are readily identified by reason of the fact that they are lower in pitch than the regular characteristic of the radio beacon.

A group of two sound signal blasts of corresponding length is sounded by the fog alarm at the same time so that when within audible range of the sound signal, navigators of vessels with radio receivers capable of receiving the radio beacon signals may readily determine their distance from the station by observing the

## Honolulu Mails

Two old Scotchwomen met after many years of separation. "Said one to the other, 'I haven't forgotten you, and I haven't written you, and always I've watched the papers to see if you were dead.'"

## RHEUMATISM? Lame Back? Painful Hip?

Captain W. J. Duncan, Chatham, N.B., wrote: "My Rheumatism started to come on 7 years ago. It has been very painful. Recently I haven't been able to raise my hand. But in the last three weeks I've had great relief—thanks to T-R-C's. They've made a new man out of me. I no longer need misery—take T-R-C's. No harmful drugs. 50c and \$1 everywhere."

**T-R-C's**

## Pilchard Fishing Boat Snow Drift Took 3,200 Tons

VANCOUVER, Nov. 1.—The sixty-foot seine boat Snow Drift, Captain Orl Orlerson, led pilchard fishing boats on the British Columbia coast this season with a total catch of 3,200 tons.

time in seconds which elapses between hearing any part of the distinctive group of radio dashes (at the end of the long dash) and the corresponding part of the group of sound signals from the fog alarm, and dividing the result of five or more exactly 5-51 for nautical miles. The error of observation should not exceed 10 per cent. The one-second radio dash preceding the long dash and the corresponding one second blast of the fog alarm are a standard of warning signal and serve as an identification signal to assure the observer that he is taking time on the correct signal blast. For observations on these signals, a watch with second-hand seal, that is required, although a stop watch is more convenient. Observations for distance off at these stations are not restricted to vessels with direction finders, but may be made by any vessel having a radio receiver capable of receiving at 296 kilocycles. A loud speaker is desirable although not necessary.

The following is an example of the use of these synchronized signals at Point Atkinson: If the interval between hearing the end of the five-second radio dash marking the end of the radio beacon minute and the end of the long five-second blast of the fog horn is thirty-three seconds, the observer is—33 divided by 5.5—six miles from Point Atkinson fog alarm.

Hearing the group of short and long radio dashes with the long dash note is an indication that there is fog at the station and that the fog alarm is operating. The fog alarm maintains its regular schedule of one two-second blast every thirty seconds at times other than when synchronization with the radio beacon signals takes place.

Note—This notice cancels previous information concerning Point Atkinson shown in Notes to Mariners No. 5 (13) of 1935.

R. K. SMITH, Deputy Minister.

## MOVEMENT OF CARGO HEAVY

Fruit and Salmon Loading Keeping Seattle Waterfront Workers Busy

SEATTLE, Nov. 1.—A heavy movement of cargo, with eighteen ships being worked, kept all available longshoremen and 350 outside men busy today on the waterfront.

Secretary Dewey Bennett, of the Seattle International Longshoremen's Association, reported about 150 men were brought here from Tacoma.

The I.L.A.'s normal membership of 1,400 men here were "all on the job," he said. The seasonal movement of fruit and salmon accounts for the extra work.

## Chronic Bronchitis?

Does coughing, hacking, spitting, tickle your throat? Take RAZ-MAH. It is a powerful bronchial cough. Lets you breathe freely, sleep soundly, quickly relieves wheezing, shaking for breath. No smoke, no taste, no smell. Just clean, easy-to-take capsules. Hold—money refunded 50c and 10c with drug sale. \$2.25.

Templeton's RAZ-MAH Capsules

## NO BERGS ON GREAT CIRCLE

North Pacific Ocean Free From Ice Peril All Year Round

"Icebergs may come and icebergs may go on the North Atlantic, but the Japanese current in the North Pacific flows on forever."

This semi-annual publication was used recently by an "expert" of the American Mail Line in commenting upon the fact that Atlantic liners carrying passengers to and from Europe and America have recently come perilously near to loose bergs adrift in the North Atlantic.

"The travel lanes of the North Pacific between America and the Orient are absolutely free from dangers of this kind from one year's end to the other," he stated. "The explanation for this immunity is found in the warm Japanese current, and in the fact that the two long 'strings' of islands known as the Kurile and the Aleutians form effective 'dikes' or barriers against ice coming down from the Arctic. Consequently any Pacific liner is absolutely unharmed."

Captain Alvin O. Lastic of the Ss. President Jefferson, one of the most experienced skippers of Bering Sea and North Pacific waters, recently stated that never in his long experience has he sighted an iceberg on the Great Circle Route between Victoria and Yokohama.

## NATIVE MUSIC IS UNTOUCHED

Modern Jazz Has No Place On Chinese and Japanese Instruments

The native music of the Orient is still untouched by the modern jazz craze, according to George Alvin, leader of the orchestra on the American Mail liner Ss. President Jefferson.

"Whatever else may be said of the music of China and Japan," he stated recently, "it contains none of the syncopated elements which have crept into the music of the Western world. The airs composed by the flutes, drums, fiddles, and gongs of China, and by the samisen and koto of the Japanese, are as unaccompanied as they were a thousand years ago."

Mr. Alvin believes that the bamboo pipe-organ in the old Reolitos Church in La Paz, ten miles out of Manila, is the most unique instrument of its kind, not only in the Orient, but in the world. Despite the fact that it is considerably over a hundred years old, it has survived the ravages of time, elements and insect.

# CRUCIAL GRID FIXTURES CARDER IN EAST TODAY

## Crowd of 20,000 Expected to See Feature Fixture

Big Attendance to Sit in at Queens-University of Toronto Clash—Roughriders and Winnipeg To Play in Snow and Cold Temperature—Meralomas Set for Calgary

TORONTO, Nov. 1 (P.)—Heavy rains soaked Eastern battlegrounds today, assuring at least a soft footing in Toronto and Hamilton, where tomorrow's feature football engagements will be fought. Any more pre-game rains would make some fields muddy.

Only in the event of a mucky gridiron would Queen's benefit greatly over University of Toronto in their inter-collegiate union game in Toronto. Heavy mud would slow down the Toronto running plays and a greasy ball would handicap Hugh Marks, star forward-passer.

Indications were that a crowd of 20,000 would watch the college teams in action, whether or not it rained at game time. Toronto can clinch first place in the standing with a victory, and the blues haven't yet decided whether they will take part in a play-off in that event.

A plan by which the team placing second would qualify for a play-off if it held a victory or a tie against the leading team was approved by McGill, Western and Queen's—but not Toronto.

**TACKLES MCGILL**  
In the other college fixture, Western plays McGill at Montreal, while the headline Big Four game brings together Hamilton Tigers and Toronto Argonauts at Hamilton. Argos can clinch the championship by winning this one for their seventh straight victory. Montreal visits Ottawa Roughriders in the other Big Four game.

The only O.R.F.U. contest brings together Regina Imperials and Hamilton Cubs at Regina, with the Imperials favored to pile up a big score.

**IMPORTANT FIXTURE**  
WINNIPEG, Nov. 1 (P.)—Al Ritchie brought his Regina Roughriders into town tonight, pushing the pitch of excitement over tomorrow's inter-collegiate rivalry, struggle between Winnipeg and Regina another notch higher.

And one notch higher was just about as much as excitement here could stand. Snow and frosty temperatures haven't dampened Winnipeg's Rugby enthusiasm a bit for what is expected to be the greatest gridiron battle the West has ever seen.

Over in Osborne Stadium, still covered with snow to protect the field against snow, carpenters hammered in extra seats figured to bring seating capacity to 6,000. The stadium is built to hold 4,500.

When Roughriders won their first Western Rugby championship from Winnipeg Rowing Club, November 10, 1912, the weather conditions hampered about the same as the prevailing for the current game.

Since then the Riders have won the championship fifteen times and lost out in six. Whoever wins tomorrow must meet the Alberta-British Columbia champions for the Western title. Winnipeg is after Manitoba's fifth title.

Both teams are in good shape. Early season injuries have been given every care and all the stars will be on the field.

**MERALOMAS READY**  
CALGARY, Nov. 1 (P.)—Anything can happen and nothing will surprise when Calgary Bronks and Vancouver Meralomas, two unknown quantities, meet here tomorrow in the Western Canada Rugby semifinal on a slippery field, with the mercury settled near the zero mark.

Bronks, little resembling the wobbly machine crushed four times in early season exhibition games against Regina Roughriders and Regina Imperials, Dominion champions, are slight favorites to defeat the British Columbia titheholders and meet either Regina or Winnipeg in the final.

Meralomas, with two strong young punters, Joe Ross and Tom Ferris, are expected to launch a kicking and extension-run attack against the Alberta champions, whose powerful line has played steadily all year in front of an erratic backfield.

Couch Carl Cronin has added precision and power to his Bronks and the team has improved rapidly within the last two weeks, and will just about reach its peak for tomorrow's encounter. Bronks probably will resort to bucking tactics to defeat Meralomas.

**HOLDS THE EDGE**  
With a combination of seasoned stars and fleet youngsters, Meralomas hope to end the JINK CALGARY outfit's have had over British Columbia representatives and repeat the victory they scored last year over University of Alberta. A Coast team has never beaten a Calgary squad in play-downs. In three series, Calgary has won four games, while losing one.

**CAGE GAME WON BY CENTENNIALS**  
Outsourcing their opponents in both halves, Centennials chalked up another victory in the Royal Juvenile Basketball League, Thursday night, at the Memorial Hall, by swamping Jones Boys under a 37-11 score. J. McGary with a dozen points, and G. Harknett with ten, led the scorers, while B. Lovell and A. Bladen accounted for all the basket points.

Alex MacDonald handled the whistle, and teams follow:  
Centennials—McGary (12), Couch (4), Hampton (4), Harknett (10), Travis (7), Mihlin.  
Jones Boys—Lovell (5), Adam Bladen (4), Miller, Jephson, MacArthur, McMartin, Malcolm.

## Flattens Neusel in Quick Fashion

**PRIMO CARNERA**  
FORMER heavyweight champion of the world, who started his comeback campaign for another title shot last night in New York by scoring a fourth-round technical knockout over Walter Neusel, German-heavy, the giant Italian won as he pleased, punching the Teuton all over the ring from the start.

Neusel, who was expected to be a tough fight, was knocked out in the fourth round by a series of powerful punches from Carnera.

Carnera, who is 6' 10" tall and weighs 250 pounds, was a former world champion in 1914. He has since been defeated by several other champions, but he is now back in the ring.

Neusel, who is 5' 10" tall and weighs 180 pounds, was a former world champion in 1928. He has since been defeated by several other champions, but he is now back in the ring.

## COPENHAVER HORSE FIRST

Captures Feature at Tanforan by Three Lengths—Daily News Second

SAN FRANCISCO, Nov. 1 (P.)—High Tension, owned by Lonnie Copenhaver, Washington turfman, and ridden by Charlie Schultz, won today's feature race at Tanforan. It was a one-mile gallop, with the winner's time being 1:40 2-5, over a sloppy track.

There were but four horses in the race, with Distribute and Bonny Crawford scratched because of track conditions.

High Tension, Daily News and Brown-Eyed Pat were well bunched for the first half, but High Tension pulled away and won easily by three lengths. Daily News ran second and Brown-Eyed Pat took the show place.

The winner paid \$3.40 and \$2.40, with Daily News returning \$2.80. There were no show bets made.

**Results follow:**  
First Race—One mile.  
High Tension (Copenhaver) 1:40 2-5, \$3.40 \$2.40.  
Business Man (Richardson) 1:41 1-2, \$2.80 \$1.80.  
Navy's Daughter (Josephson) 1:42 1-2, \$2.80 \$1.80.  
Time, 1:42 1-2. Also ran: Duke Butler, Lince, Gloster, Millard, Dorset, Real Ceram, Miss Flie and Pearly, Cold Wave, Gold Clasp.

Second Race—Six furlongs.  
Baron (Merritt) 1:25 3-4, \$3.40 \$2.40.  
George's Hot (Rever) 1:26 1-2, \$2.80 \$1.80.  
Lucile K (Schultz) 1:27 1-2, \$2.80 \$1.80.  
Time, 1:25 3-4. Also ran: Pickard, Electric, Speed, Boulder, Rehearsal, Pom-pom, Gabe, Elton, Willie Klein, Buster.

Third Race—Five and one-half furlongs.  
Rahmy (Thompson) 1:37 4-5, \$3.40 \$2.40.  
Purvis (H. Leichman) 1:38 1-2, \$2.80 \$1.80.  
Royal Charm (Kaiser) 1:39 1-2, \$2.80 \$1.80.  
Time, 1:37 4-5. Also ran: Hanna, Marina, Pima Star, Gentle, Uncle Gus, Iron Claw.

Fourth Race—Six furlongs.  
Brown Wisdom (Summers) 1:40 1-2, \$3.40 \$2.40.  
Healthy Hop (Rever) 1:41 1-2, \$2.80 \$1.80.  
Scrabble Knight (D. Neill) 1:42 1-2, \$2.80 \$1.80.  
Time, 1:40 1-2. Also ran: Duke Butler, Lince, Gloster, Millard, Dorset, Real Ceram, Miss Flie and Pearly, Cold Wave, Gold Clasp.

Fifth Race—One mile.  
Jimmy G. (Thompson) 1:40 1-2, \$3.40 \$2.40.  
Gold Return (Sperry) 1:41 1-2, \$2.80 \$1.80.  
Lucky Star (Rever) 1:42 1-2, \$2.80 \$1.80.  
Time, 1:40 1-2. Also ran: Tynemouth, Oliver, Emma.

Sixth Race—One mile.  
High Tension (Schultz) 1:40 1-2, \$3.40 \$2.40.  
Daily News (McCombs) 1:41 1-2, \$2.80 \$1.80.  
Brown-Eyed Pat (McGowan) 1:42 1-2, \$2.80 \$1.80.  
Time, 1:40 1-2. Also ran: Bibbes Choice, Gabe, Elton, Willie Klein, Buster.

Seventh Race—One mile.  
Gabe (Martini) 1:40 1-2, \$3.40 \$2.40.  
Jillson (Rever) 1:41 1-2, \$2.80 \$1.80.  
Alma (H. Leichman) 1:42 1-2, \$2.80 \$1.80.  
Time, 1:40 1-2. Also ran: Duke Butler, Lince, Gloster, Millard, Dorset, Real Ceram, Miss Flie and Pearly, Cold Wave, Gold Clasp.

Eighth Race—Mile and one-sixteenth.  
Rosemaid (Rever) 1:40 1-2, \$3.40 \$2.40.  
Dorinda (Rever) 1:41 1-2, \$2.80 \$1.80.  
Time, 1:40 1-2. Also ran: Duke Butler, Lince, Gloster, Millard, Dorset, Real Ceram, Miss Flie and Pearly, Cold Wave, Gold Clasp.

Ninth Race—Mile and one-sixteenth.  
Rosemaid (Rever) 1:40 1-2, \$3.40 \$2.40.  
Dorinda (Rever) 1:41 1-2, \$2.80 \$1.80.  
Time, 1:40 1-2. Also ran: Duke Butler, Lince, Gloster, Millard, Dorset, Real Ceram, Miss Flie and Pearly, Cold Wave, Gold Clasp.

Tenth Race—Mile and one-sixteenth.  
Rosemaid (Rever) 1:40 1-2, \$3.40 \$2.40.  
Dorinda (Rever) 1:41 1-2, \$2.80 \$1.80.  
Time, 1:40 1-2. Also ran: Duke Butler, Lince, Gloster, Millard, Dorset, Real Ceram, Miss Flie and Pearly, Cold Wave, Gold Clasp.

Eleventh Race—Mile and one-sixteenth.  
Rosemaid (Rever) 1:40 1-2, \$3.40 \$2.40.  
Dorinda (Rever) 1:41 1-2, \$2.80 \$1.80.  
Time, 1:40 1-2. Also ran: Duke Butler, Lince, Gloster, Millard, Dorset, Real Ceram, Miss Flie and Pearly, Cold Wave, Gold Clasp.

Twelfth Race—Mile and one-sixteenth.  
Rosemaid (Rever) 1:40 1-2, \$3.40 \$2.40.  
Dorinda (Rever) 1:41 1-2, \$2.80 \$1.80.  
Time, 1:40 1-2. Also ran: Duke Butler, Lince, Gloster, Millard, Dorset, Real Ceram, Miss Flie and Pearly, Cold Wave, Gold Clasp.

Thirteenth Race—Mile and one-sixteenth.  
Rosemaid (Rever) 1:40 1-2, \$3.40 \$2.40.  
Dorinda (Rever) 1:41 1-2, \$2.80 \$1.80.  
Time, 1:40 1-2. Also ran: Duke Butler, Lince, Gloster, Millard, Dorset, Real Ceram, Miss Flie and Pearly, Cold Wave, Gold Clasp.

## BRUINS FACE BEARS TODAY

Great Gridiron Struggle Is Expected in the South—This Afternoon

SAN FRANCISCO, Nov. 1 (P.)—Spotlights on the Coast football scramble narrow down this week and focus sharply on the Los Angeles Memorial Coliseum, where the only Far-Western teams yet undefeated—the U.C.L.A. Bruins and the California Bears—battle in a game, which may decide the Conference title.

Three Conference teams take it easy this Saturday after last week's heavy and colorful programme, leaving the Bears an attempt to show a one-man team in Chuck Cheshire, brilliant U.C.L.A. halfback, who has been the power play in crushing Stanford and Oregon.

Although California's coach, "Doc" Allison, maintains the other ten teams on the Bruin squad are fully as important as the high-stepping Chuck, the cry on the practice field all week has been "stop Cheshire."

They hope to stop the slightly heavier Bruin line in crushing Stanford and Oregon.

If the Bears defeat U.C.L.A. tomorrow, they have tough games with Washington and Stanford as obstacles to the title. The Bruins have only Idaho, a comparatively weak team, to beat after California.

**COLLEGIANS IN HOOP VICTORY**  
St. Louis Quintette Beats Shamrocks—Next Week's Games Released By Secretary

Led by the sharpshooting Fairs, who accounted for 24 points, St. Louis College registered another triumph in the Royal Juvenile Basketball League last night at the Memorial Hall by defeating the Shamrocks, 30-21. It was a close-checking first half with the Collegians leading at the interval, 9-7. College cut loose with a wide open attack in the last twenty minutes and, through Fairs, D. Baines and Drayton, piled up a comfortable margin.

Chuck Sharpe refereed and the teams follow:  
St. Louis College—Fairs (24), Drayton (5), D. Baines (9), Monaghan, O'Connell, J. Baines, Belton, Webb (1) and Clarkson.

**MIXED TENNIS LEAGUE**  
Glenn—G. Laird, 4-6; J. Bradford, 2-6. W. W. W. 2-6. M. W. 2-6. B. W. 2-6. Total, 1-6.

**ARCANE ALLEYS**  
The Daily Colonist—W. Norris, 4-6; A. Anderson, 2-6. C. Corbett, 2-6. A. Harkness, 4-6. C. Cheshire, 2-6. Total, 2-6.

**SENIOR CITY TENNIS LEAGUE**  
The Daily Colonist—W. Norris, 4-6; A. Anderson, 2-6. C. Corbett, 2-6. A. Harkness, 4-6. C. Cheshire, 2-6. Total, 2-6.

**NEW METHOD LAUNDRIES FIVEPIN LEAGUE**  
Executive—A. T. Pinfold, 5-2; J. Irvine, 4-1. P. A. Gibbs, 4-2. Low Score, 4-2. Total, 1-2.

**ARCANE ALLEYS**  
The Daily Colonist—W. Norris, 4-6; A. Anderson, 2-6. C. Corbett, 2-6. A. Harkness, 4-6. C. Cheshire, 2-6. Total, 2-6.

**SENIOR CITY TENNIS LEAGUE**  
The Daily Colonist—W. Norris, 4-6; A. Anderson, 2-6. C. Corbett, 2-6. A. Harkness, 4-6. C. Cheshire, 2-6. Total, 2-6.

## BRUINS FACE BEARS TODAY

Great Gridiron Struggle Is Expected in the South—This Afternoon

SAN FRANCISCO, Nov. 1 (P.)—Spotlights on the Coast football scramble narrow down this week and focus sharply on the Los Angeles Memorial Coliseum, where the only Far-Western teams yet undefeated—the U.C.L.A. Bruins and the California Bears—battle in a game, which may decide the Conference title.

Three Conference teams take it easy this Saturday after last week's heavy and colorful programme, leaving the Bears an attempt to show a one-man team in Chuck Cheshire, brilliant U.C.L.A. halfback, who has been the power play in crushing Stanford and Oregon.

Although California's coach, "Doc" Allison, maintains the other ten teams on the Bruin squad are fully as important as the high-stepping Chuck, the cry on the practice field all week has been "stop Cheshire."

They hope to stop the slightly heavier Bruin line in crushing Stanford and Oregon.

If the Bears defeat U.C.L.A. tomorrow, they have tough games with Washington and Stanford as obstacles to the title. The Bruins have only Idaho, a comparatively weak team, to beat after California.

**COLLEGIANS IN HOOP VICTORY**  
St. Louis Quintette Beats Shamrocks—Next Week's Games Released By Secretary

Led by the sharpshooting Fairs, who accounted for 24 points, St. Louis College registered another triumph in the Royal Juvenile Basketball League last night at the Memorial Hall by defeating the Shamrocks, 30-21. It was a close-checking first half with the Collegians leading at the interval, 9-7. College cut loose with a wide open attack in the last twenty minutes and, through Fairs, D. Baines and Drayton, piled up a comfortable margin.

Chuck Sharpe refereed and the teams follow:  
St. Louis College—Fairs (24), Drayton (5), D. Baines (9), Monaghan, O'Connell, J. Baines, Belton, Webb (1) and Clarkson.

**MIXED TENNIS LEAGUE**  
Glenn—G. Laird, 4-6; J. Bradford, 2-6. W. W. W. 2-6. M. W. 2-6. B. W. 2-6. Total, 1-6.

Thursday—Centennials vs. West Road, Centennial Gymnasium, at 8:30. Referee MacDonald.  
Wednesday—First United vs. Jones Boys, First United Gymnasium, at 8 o'clock. Referee C. Sharpe.

**Lewis Receives Cup for Fight**  
ST. LOUIS, Nov. 1 (P.)—John Henry Lewis, Phoenix, Ariz., negro, who rose from number two challenger to the light-heavyweight throne by soundly whipping Champion Bob Olin, tonight had nothing but a silver cup to show for his victory.

Lewis was to receive 12 1/2 per cent of receipts over the \$15,000 guaranteed Olin. There weren't any receipts over that amount. In fact, Olin got only \$10,000, as the gate fell far short of the promoter's expectations.

**FLIGHT...**by W. D. TIPTON  
and J. H. MASON**PILOT CHUTES**THE SECRET OF SUCCESS OF THE  
FREE TYPE PARACHUTE, IS THE  
SMALL PILOT CHUTE, ATTACHED  
TO THE TOP OF THE MAIN CHUTE.

DURING the World War fighting pilots, faced with the ever-present horror of fire in the air, begged designers to develop a parachute which would enable them to get clear of their disabled or burning craft. The Germans used parachutes to a limited extent but they were of the fixed type; that is, the parachute container was attached to the airplane. To use such chutes, the pilot had to jump clear and fall away from his ship so as to pull the chute from its container. There was always the danger of the chute fouling the falling airplane. The inventor who thought of the little umbrella-like pilot chute has saved thousands of lives. It has been the basis of many patent suits and served for a long time to give one manufacturer a monopoly on the parachute manufacturing business.

All free type parachutes use the idea of a pilot chute which fills with air and then drags out the main chute, however they use different means to accomplish this action. The pilot chute is built over umbrella-like stays which are closed against a spring arrangement. It is the last thing packed into the parachute container and when the rip cord is pulled, the compressed spring action makes the pilot chute literally leap out of the container.

**FORTNIGHT**

There are fashions in the dress with which we clothe our thoughts as well as those in which we adorn ourselves.

So, today, we characterize as "semi-monthly" or "bi-monthly" such meetings, occurrences and the like to indicate an event that takes place, generally speaking, every two weeks.

Formerly, however, such short periods of time would be reckoned by nights; a regular recurrence, observed every two weeks would be said to take place once a fortnight, or once in fourteen nights.

**HUNTER SHOT WHEN MISTAKEN FOR DEER**

CENTRALIA, Wash., Nov. 1. A wounded deer hunter, Val Smith, of Centralia, died in a hospital after searching parties bore him from the snow-covered Bald Hills near Yelm and sped him here in an automobile.

Smith was shot through a leg on Tuesday when a hunting companion mistook him for a deer in under-land in the Bald Hills.
